

**I, Kitea Tipuna, Tumu Whakarae Chief Executive, hereby give notice that
an Extraordinary Meeting of Council will be held on:**

Date: Thursday, 1 August 2024
Time: 9:00 AM
Location: Council Chamber, Wairoa District Council,
Coronation Square, Wairoa

AGENDA

Extraordinary Council Meeting

1 August 2024

MEMBERSHIP: His Worship the Mayor Craig Little, Cr Denise Eaglesome-Karekare, Cr Jeremy Harker, Cr Melissa Kaimoana, Cr Chaans Tumataroa-Clarke, Cr Benita Cairns, Cr Roslyn Thomas

The agenda and associated papers are also available on our website: www.wairoadc.govt.nz

For further information please contact us 06 838 7309 or by email info@wairoadc.govt.nz

Order Of Business

1 Karakia.....5

2 Apologies for Absence 5

3 Declarations of Conflict of Interest5

4 Public Participation 5

5 General Items.....6

5.1 Submissions to the Long-Term Plan 2024-2027 6

- 1 KARAKIA**
- 2 APOLOGIES FOR ABSENCE**
- 3 DECLARATIONS OF CONFLICT OF INTEREST**
- 4 PUBLIC PARTICIPATION**

A maximum of 30 minutes has been set aside for members of the public to speak on any item on the agenda. Up to 5 minutes per person is allowed. As per Standing Order 14.14 requests to speak must be made to the meeting secretary at least one clear day before the meeting; however this requirement may be waived by the Chairperson.

5 GENERAL ITEMS

5.1 SUBMISSIONS TO THE LONG-TERM PLAN 2024-2027

Author: Lauren Jones, Acting Group Manager - Community Services and Development

Authoriser: Kitea Tipuna, Tumu Whakarae Chief Executive

Appendices:

1. [Submission analysis](#)
2. [Speaking Submissions](#)
3. [Non-speaking/Written Submissions](#)

1. PURPOSE

- 1.1 The purpose of this report is to provide Council with a breakdown of the key themes and topics from the submissions received from the community throughout the formal consultation period for the Long-Term Plan (LTP) 2024-2027
- 1.2 This report has copies of the submissions to the LTP 2024-2027 for Council's consideration as part of the deliberations process.

RECOMMENDATION

The Acting Group Manager - Community Services and Development RECOMMENDS that Council:

1. Receive and consider all submissions made on the Long-Term Plan 2024-2027 Consultation Document.
2. Receive and consider all submissions in relation to "No Time to Waste."
3. Adopt the preferred option for Tautoko Wairoa | Buying Locally: Option 1 - Maintain status quo OR Option 2 - Purchase from local business on a case by case basis.
4. Adopt the preferred option for *Decision 1 - Essential Repairs or Improvements to Our Land Transport Network*: Option 1 - Rectification + BAU OR Option 2 - Rectification + BAU + Targeted improvement.
5. Adopt the preferred option for *Decision 2 - Solid waste management and minimisation*: Option 1 - Development of a New Landfill Cell OR Option 2 - Out of District Disposal.
6. Adopt the preferred option for *Decision 3 - Kerbside Collection*: Option 1 - Business as usual OR Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections.
 - a. Adopt the preferred option of a fortnightly kerbside wheelie bin service for rubbish OR continue weekly user-pays rubbish bag.
 - b. Adopt the preferred option of introducing a weekly food and garden waste collection in Wairoa, Frasertown and Mahia OR introducing a food waste collection in Wairoa, Frasertown and Mahia.
 - c. Adopt the preferred option of introducing a fortnightly kerbside wheelie bin for recycling in Wairoa, Frasertown and Mahia OR maintaining a weekly kerbside recycling service (open bin).
7. Adopt the preferred option for *Decision 4 - Breathing new life into Wairoa businesses*: Option 1 - No investment OR Option 2 - Annual Investment.

8. Adopt the preferred option for *Decision 5 - Protecting Our Taonga - The Future of Our Archives*: Option 1 - Keep the archives in Wairoa OR Option 2 - Move archives out of district.
9. Discuss and adopt any additional Council-initiated changes arising from Long-Term Plan 2024-2027 and No Time to Waste hearings.
10. Instruct staff to prepare a Long-Term Plan 2024-2027 for adoption at Council's meeting on 8 August 2024, incorporating any amendments resulting from resolutions made during the Council deliberations process.
11. Note that the final content of the Long-Term Plan 2024-2027 is subject to minor corrections.

2. BACKGROUND

- 2.1 Due to the introduction of the Severe Weather Emergency Recovery Legislation Act 2023 (SWERL 2023), Wairoa District Council is producing an unaudited Three-Year LTP with a recovery focus, in place of the usual 10-Year Long Term Plan.
- 2.2 The Local Government Act 2002 (LGA 2002) requires Council use the special consultative procedure to consult with the community before adopting the final plan. This process involved the adoption of a Consultation Document (6 June 2024 Council meeting) which summarised Council's intentions over the course of the plan.
- 2.3 Consultation for the LTP 2024-2027 opened on 17 June 2024 and closed on 17 July 2024. The document asked the community to provide feedback on six big decisions each with two options, that clearly set out the impact on rates and council debt:
 - Tautoko Wairoa | Buying Locally
 - Decision 1 - Essential Repairs or Improvements to Our Land Transport Network
 - Decision 2 - Solid waste management and minimisation
 - Decision 3 - Kerbside Collection
 - Decision 4 - Breathing new life into Wairoa businesses
 - Decision 5 - Protecting Our Taonga - The Future of Our Archives

A supplementary consultation "No Time to Waste" ran co-currently, asking the community:

- Do you support Council's proposal to replace the current weekly user-pays rubbish bag service with a fortnightly kerbside wheelie bin service for rubbish?
- The proposal is to introduce a weekly food and garden waste collection in Wairoa, Frasertown and Mahia. Do you support the introduction of this service?
- If yes, what option should Council introduce: food only or combined food & garden;
- Do you support the proposal to replace the current weekly kerbside recycling service with a fortnightly kerbside wheelie bin for recycling in Wairoa, Frasertown and Mahia?

Links to the Council's draft Financial Strategy, Draft Infrastructure Strategy and Draft Fees and Charges, along with other relevant Policies and documents were included on the consultation website.

- 2.4 The consultation document for the plan was supported by community engagement sessions. Originally a number of community meetings and caravan sessions were scheduled, however due to the 26 June 2024 rain event and subsequent Civil Defence emergency response, only the 25 June community meeting at Wairoa War Memorial Hall went ahead. In order to engage with the community through the response period, facebook engagement was prioritised to promote interaction with the consultation document. The consultation documents and feedback forms were distributed to local stores around the district and a drop in session was held in Council Chambers on 15 July, with a phone-in option available.
- 2.5 Any member of the public could submit, either online or via a hard-copy form. Council received a total of 48 submissions for the LTP 2024-2027 and a total of 43 submissions for No Time to Waste.
- 2.6 300 consultation documents were printed and distributed through the community. 60 radio advertisements ran across two local radio stations. Facebook posts relating to the LTP consultation had a reach of 32,900, with a reach of 9,800 for No Time to Waste posts. There were 1,267 webpage views for the LTP 2024-2027 consultation page, and 354 views for the No Time to Waste consultation page.
- 2.7 Attached to this report is the submissions received during this period. They are divided into two sections – speaking (appendix 1) and non-speaking (appendix 2).
- 2.8 Once Council has received the submissions, the next step in the process is to begin deliberations on the final LTP 2024-2027.

3. ANALYSIS

- 3.1 Refer Appendix 1 for analysis of the submissions.

4. SUBMISSIONS

- 4.1 Refer Appendix 2 and 3 for speaking and non-speaking submissions received.

5. CORPORATE CONSIDERATIONS

What is the change?

- 5.1 The submissions will present information which will be considered during deliberations, this may inform changes to the draft LTP before it is adopted.

Compliance with legislation and Council Policy

The legislative requirements associated with the consultation document and its adoption are contained in the Local Government Act 2002, in particular:

- Section 93A: Use of special consultative procedure in relation to LTP.
- Section 93B: The purpose of the CD for the LTP.
- Section 93C: Content of CD for adoption of LTP.
- Section 93F: Form and manner of presentation of CD.
- Section 93G: Information to be adopted by local authority in relation to LTP

As modified by the Severe Weather Emergency Recovery Legislation Act 2023 and Severe Weather Emergency Recovery (Local Government Act 2002—Long-term Plan) Order 2023

What are the key benefits?

- 5.2 The key benefit of receiving submissions is to better understand the Community's feedback.

Who has been consulted?

The Hearings process is part of consulting the entire community. The community has also had the opportunity to provide informal feedback through drop in sessions and a community meeting.

Confirmation of statutory compliance

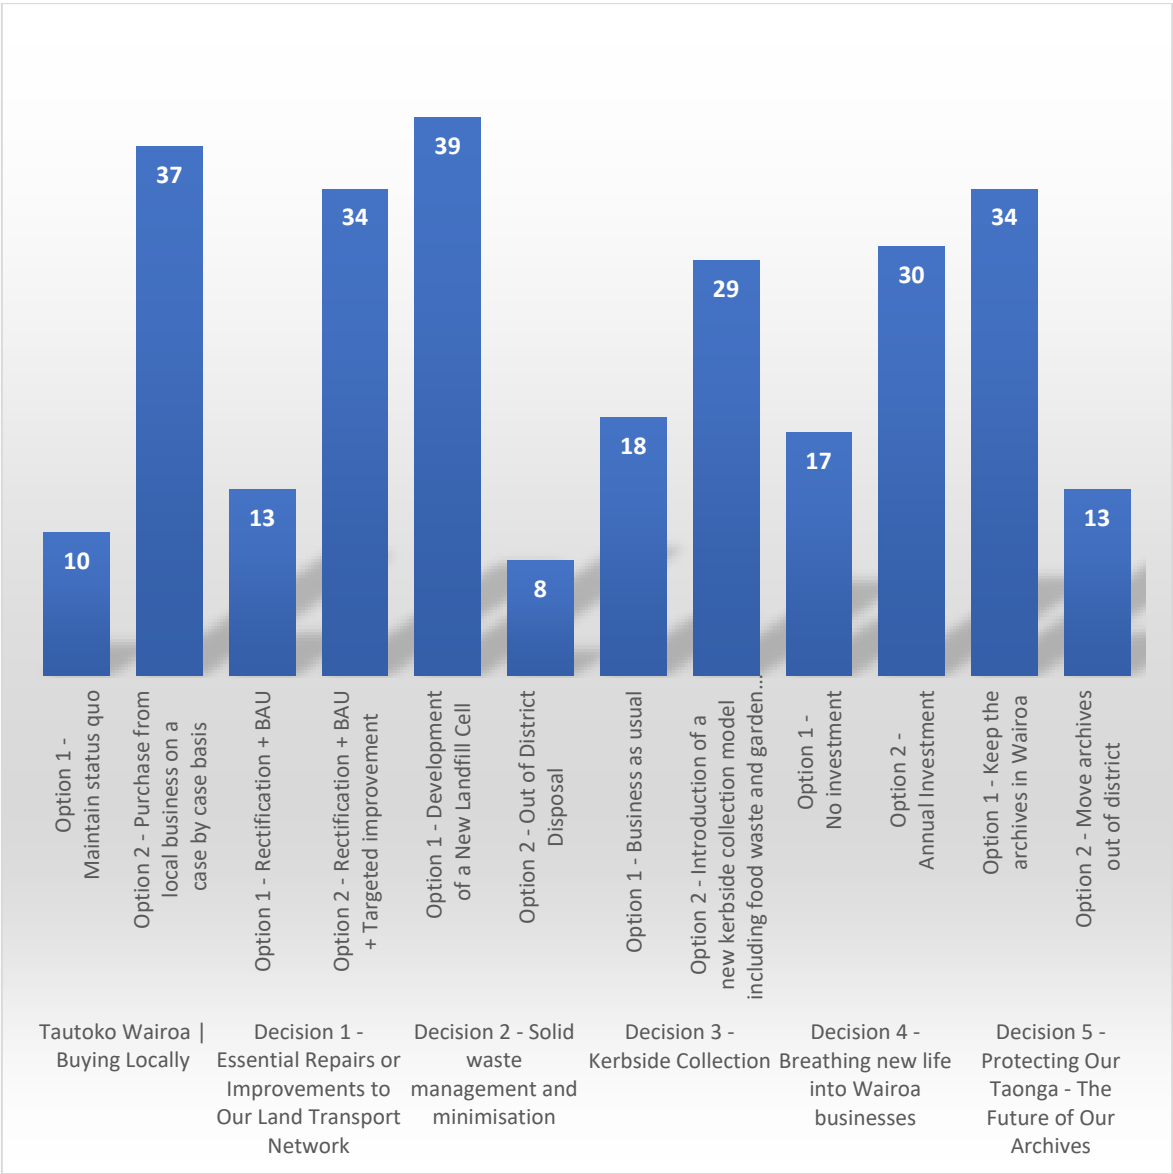

In accordance with section 76 of the Local Government Act 2002, this report is approved as:

- a. containing sufficient information about the options and their benefits and costs, bearing in mind the significance of the decisions; and,
- b. is based on adequate knowledge about, and adequate consideration of, the views and preferences of affected and interested parties bearing in mind the significance of the decision.

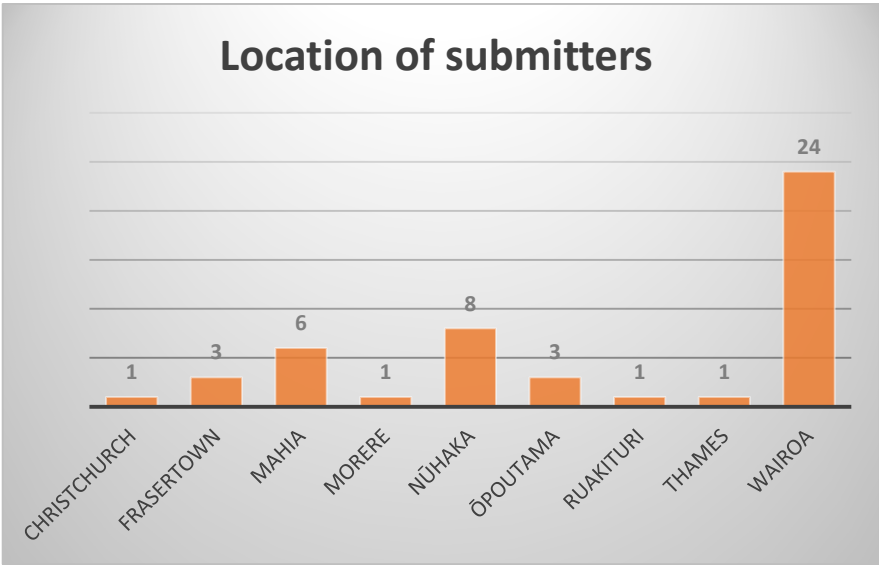

Long-Term plan submissions analysis

This report summarises the feedback received for each consultation item, along with other, more general feedback received through the submissions process. The consultation document details each topic and all submissions are included as an attachment to this report. In addition to single response tick-boxes, allowing respondents to select their preferred option for each consultation topic, submission forms also allowed free-text responses to provide additional comments related to the Long-Term Plan consultation. These responses were reviewed to identify key themes, concepts or issues within submitted feedback.

The LTP Consultation received 45 online submissions and 3 paper submissions. 7 responses were on behalf of a group or organisation (15%) and 9 respondents expressed their willingness to speak in-person in support of their submission (19%).

Although 50% of submitters were located in the Wairoa township, responses were received from across the district. There were two submissions received from outside of the Wairoa district.

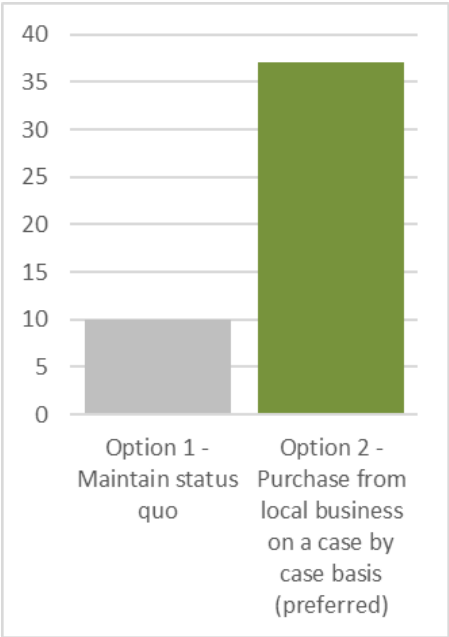

Tautoko Wairoa | Buying Locally

Respondents were presented with the below two options:
Option 1 - Maintain status quo
Option 2 - Purchase from local business on a case by case basis (preferred)

79% of respondents selected the preferred option 2.

Additional comments showed that, while there is strong support for buying locally to benefit the Wairoa community, there is also recognition of the need for responsible fiscal management and ensuring that all procurement decisions are made with the best interests of ratepayers in mind. Balancing these considerations will be crucial for the Council in implementing effective local procurement policies that support both economic development and financial prudence.

Key themes from the respondents are as follows:

Balancing Local Support with Financial Prudence: There is a clear emphasis on balancing the desire to support local businesses with the need for financial efficiency. Respondents acknowledge that while supporting local businesses is important for community development and economic resilience, it should not come at the cost of overpaying when more cost-effective options are available through larger contracts or online purchasing. There is a consensus that local businesses should be supported when they can offer competitive value and quality but that there should be transparency in procurement decisions. Respondents suggest a flexible approach where local businesses are

prioritised when feasible and practical, especially when they can offer tailored solutions or services that meet the specific needs of the Council or community.

"There are sound reasons for the Council to purchase in bulk through already-in-place agreements and protocols. However, Council should make every effort to purchase locally wherever possible keeping ratepayer money within the community."

"Council should endeavour to source everything locally before looking outside Wairoa."

"If it unnecessarily increases costs for things that don't add value to Council services and activities (e.g., pens!), it is better to go for the lowest cost given all of the challenges our district faces and direct the funds elsewhere."

"Inappropriate at this juncture to be removing access to quality discounts at a time where fiscal restraint needs have never been more evident no matter how much we would love to tautoko local."

"WDC is to ensure this is covered competitively in Finance, Assurance & Risk committee policies and procedures."

"The purpose of council is not to support selected business by spending with them - its job is to support ALL business by providing services to the town which allow us to operate to the best of our abilities and grow."

"May I suggest a certain percentage can be set aside for mandatory support of local businesses - say 25% local purchase, 75% nationally sourced. Many local businesses simply can't compete financially, but I'd be perfectly ok with a smidge extra spent to support local. Without business incentives here, our town will die."

"In light of the recent flooding in Wairoa, which has compounded the ongoing recovery efforts from Cyclone Gabrielle, the Council must prioritise essential services and recovery. This includes getting the best bang for buck from All of Government contracts and the likes."

Community and Economic Development: Many responses highlight the importance of local procurement in stimulating the local economy and creating jobs within Wairoa. Supporting local businesses is seen as crucial for the town's economic success and resilience, particularly in the context of natural disasters like recent flooding and post-Cyclone Gabrielle recovery.

"Tautoko Wairoa / Shop Local should be on signs on each store and each & everyone of us should be reminded that every dollar we spend locally keeps our economy going. Every dollar spent out of town is a nail in the coffin of our businesses."

"Council would be supporting local business, helping to keep those business running, and keep them in our area."

Environmental and Social Benefits: Local procurement is viewed favourably due to potential environmental benefits, such as reduced carbon footprint from transportation, and social benefits like stronger community ties and reduced economic disparities within Wairoa.

"Supporting local businesses can lead to more job opportunities within the community."

“A sustainable township involves investing in the local business, local people in order to develop a resilient community. This should involve all of the community in order to create local pride in the township.”

“Local suppliers are often more accessible, allowing for better communication and quality control.”

“Local businesses are more likely to be accountable to the community and responsive to the council’s needs and concerns.”

“Where a local business can compete on value and/or associated service provided it is important to tautoko them as part of achieving the broader community outcomes.”

Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Respondents were presented with the below two options:

- Option 1 - Rectification + BAU
- Option 2 - Rectification + BAU + Targeted improvement (preferred)

72% of respondents selected the preferred option 2.

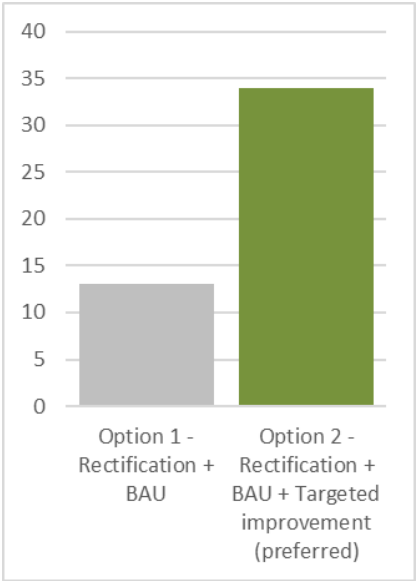

Additional comments showed that the community was aware of the need to balance immediate recovery needs, fiscal responsibility, and long-term infrastructure planning. There is a clear desire for the Council to prioritise essential services and pursue funding opportunities that lessen the financial impact on ratepayers.

Several responses emphasise the urgent need to address local infrastructure issues and create comprehensive plans that consider community needs and safety. This includes concerns about the fragility of current road networks, economic development implications, and the importance of securing funding through infrastructure funds or targeted tolls. Respondents also highlight the importance of community engagement and clear communication in infrastructure planning. This includes requests for clear communication and engagement with the community to improve public understanding and ensure that public feedback in decision-making processes regarding project prioritisation and funding allocation is informed and meaningful.

Prioritising Basic Infrastructure and Recovery: Respondents emphasise the need to prioritise basic infrastructure and recovery efforts, particularly in light of recent natural disasters such as floods and ongoing challenges like coastal erosion. Respondents express concern that current needs must be met before committing to new projects or expansions. Respondents advocate for prioritising essential services, ensuring proposed investments meet community expectations and seeking external funding sources to support infrastructure upgrade projects.

“Local infrastructure needs to be addressed and a decent plan created to address key areas - taking into account access for those still affected from previous weather events.”

“You will have to improve to the road networks in order for this region to survive”

Financial Prudence and Transparency: There is a notable concern about financial prudence and transparency in Council spending. Respondents question the cost-effectiveness of proposed projects, with a call for clarity in understanding how funds are allocated and how projects align with available grants or subsidies.

"There is no AMP or draft Infrastructure Strategy available to inform choosing between the options as to what is meant by safety and resilience improvements and how this would be prioritised/ or where they are. Whilst I agree they are needed in principle, it is unclear how value add would be achieved across the network and what improvements would be the best "bang for buck" and how this would play out under this scenario. Suggest further work is needed in this space or made available to the public to enable trade-offs to be made."

"the costs far outweigh the collective economic base of most Wairoa ratepayers"

"Council should not be budgeting for and subsequently rating the local share for projects that are highly unlikely to receive co-funding from NZTA through the application of the GPS. The district has invested heavily over the last 9 years in levels of service to the urban and rural communities. I believe this should be scaled back this 3-year plan to reflect returning levels of service and allow the community to invest in other priorities."

Future-Proofing and Resilience: Despite concerns about immediate costs, there is also recognition of the need for long-term planning and investment in infrastructure resilience. Respondents highlight the importance of future-proofing the transport network against extreme weather events and ensuring sustainable development practices are upheld.

"Given the history of extreme weather events, investing in targeted improvements can make the transport network more resilient to future events, potentially saving costs and disruptions in the long run."

"Investing in improvements alongside rectification not only addresses current needs but also prepares the community for future challenges, aligning with sustainable development and resilience goals."

Decision 2 - Solid waste management and minimisation

Respondents were presented with the below two options:

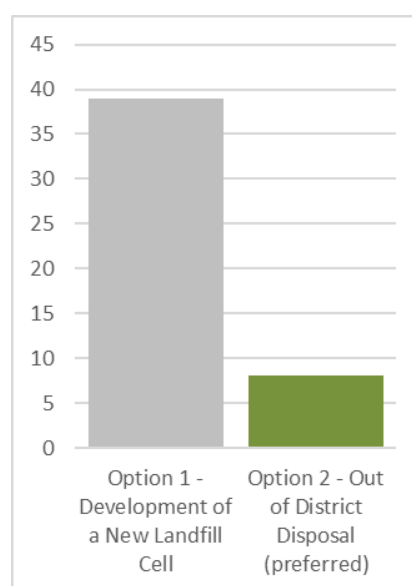

Option 1 - Development of a New Landfill Cell

Option 2 - Out of District Disposal (preferred)

83% of respondents selected option 1. Over 50% of respondents also provided commentary to their answer.

The responses identify concern around balancing economic feasibility, environmental sustainability, and long-term resilience in waste management practices. There is a clear desire for the Council to explore innovative solutions, engage the community effectively, and prioritise local economic benefits while managing the district's waste effectively and responsibly.

Local Economic and Environmental Impact: There is a strong emphasis on keeping waste management local to retain economic benefits within the district.

Respondents highlight the potential economic opportunities associated with managing waste locally, including job creation and local investment. Additionally, keeping waste management local is seen as beneficial for minimizing environmental impact, reducing road transport, and supporting sustainable practices such as waste minimisation and recycling.

“by keeping waste management local we have greater incentives as a community to strive for waste minimisation and reuse. And this option keeps investment in the District, so contributing to economic development and also reduces land transport of waste via road with added burden on the roading system.”

“Disposal of Wairoa rubbish in another town/country is not a desirable choice. Wairoa needs to become more self sufficient and sustainable”

“Opening the new landfill cell is preferable as the district requires a functional landfill even in times of extreme weather when the roads north, south and west might all be shut.”

“Utilizing external facilities provides flexibility and can mitigate risks associated with the long-term management of a local landfill, such as regulatory changes or unforeseen environmental impacts.”

Cost and Financial Prudence: There is concern about the costs associated with both options (local vs. out-of-district disposal). Respondents express skepticism about the affordability of out-of-district disposal for local residents and advocate for solutions that are financially prudent in the long term.

“An out-of-district plan will be too costly for local residents who are already facing higher costs imposed for the local landfill”

“Further, our geography - with all those hills - makes the trucking of waste outside the district a terribly inefficient proposition. What, for example, would the figures look like if the fuel price suddenly doubled?”

“Keep local to try to minimize road usage and costs to rate payers.”

“Exploring options with adjoining Councils on co-ownership would be worth investigating prior to defaulting to the out of district proposal.

The landfill operations are a business and employment opportunity and should be explored with a commercial and long term view.”

Innovation: Many respondents stress the importance of long-term sustainability in waste management practices. Suggestions include exploring advanced technologies like waste-to-energy plants or methane capture to generate electricity. There is a clear desire for innovative solutions that reduce reliance on traditional landfill methods and promote environmental responsibility.

“Develop a new site and incorporate future technologies such as capturing the methane gas to power generators. This has already been done in Auckland”

“The prospective new cell should be the last cell ever required. In the long term all products which cannot be recycled or composted could be processed in a waste to energy plant as is already done overseas. These plants operate at high temperatures (thousands of degrees) and meet strict emissions standards, while generating electricity for their localities.”

"You have an opportunity to be innovative here and perhaps even create new job opportunities with new industry... There are recycling plants, waste-to-energy bio fuel plants etc that create their own electricity & biofuel etc (there are even small portable plants which may suit us). Fortune favours the brave and there is no reason why we can't be leaders in a field - even if it's rubbish disposal"

Waste Minimisation Education and Behavioural Change: There is recognition of the role of education in promoting waste reduction behaviours among residents. Respondents suggest initiatives to encourage recycling, reuse, and responsible consumption habits to reduce the overall volume of waste generated. There is concern about the environmental impact of landfill operations and the importance of adhering to best practices in waste disposal and management.

"Ultimately, everybody needs to create less waste which will be a great challenge that cannot be achieved by either option alone... Eventually, with all waste significantly minimized the cost will go down for people, which is true for both option 1 and 2."

"More recycling efforts encouraged. An Eco barn to store things that may be reused. Encourage people to come to the ecobarn/recycling center with their unwanted and collect for a small fee something they might want."

"as kaitiaki the focus must be on minimising waste, encouraging business to provide zero waste options and if that is impossible purchase responsibly"

"Out of District Disposal option is an environmental lie - it's called "Green Washing". It does not make you better "environmental performers" it is still your rubbish hiding in someone else's backyard. I would have liked to have read what ideas/solutions, if any, mana whenua or para kore have. Are they viable?"

"Teach people to recycle to reduce"

"The higher costs associated with out-of-district disposal can incentivize the community and local government to adopt more aggressive waste minimisation, recycling, and composting programs, aligning with broader sustainability goals."

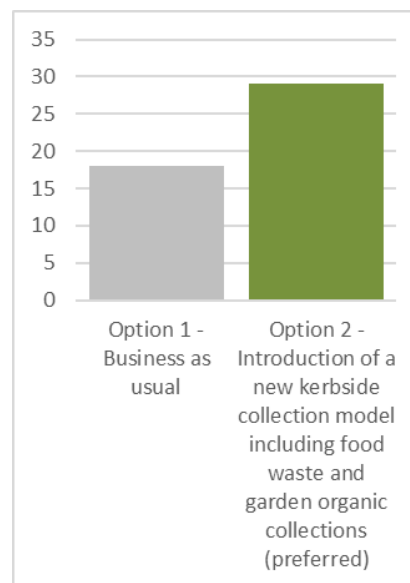

Decision 3 - Kerbside Collection

Option 1 - Business as usual

Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections (preferred)

62% of respondents selected option 2.

Overall, the responses reflect that the community is concerned about balancing environmental responsibility with economic feasibility in waste management decisions. There is a clear desire for solutions that encourage waste minimisation, promote community engagement, and maintain financial prudence while addressing the district's waste management needs effectively.

User Pays vs. Rates Funding: Concerns are raised about the cost-effectiveness and efficiency of proposed waste management solutions. Many respondents express concerns about the financial burden on ratepayers if the cost of waste management is included in rates. There is a preference among some for maintaining the user pays model as it provides a direct incentive for waste reduction and recycling. Others argue for subsidizing or providing free services for certain demographics, such as pensioners. Respondents suggest enhancing existing transfer stations to handle food waste and green waste effectively, rather than investing heavily in new kerbside collection systems that may not align with community needs or behaviours.

“Not everyone uses the current kerbside collection so making them pay through the nose via rates is removing any and all incentive to live sustainably and work towards zero waste. ... This is a classic example of the appropriateness of User Pays not charge everyone for something that many won't use”

“The user pays system at least encourages people to recycle (because it costs them not to), and at the transfer station they are watched to a reasonable degree (and helped where needed) to put their recycling in the right bins, remove the bottle caps, etc etc.”

“This will cost ratepayers more but with services such as these it should be on a user pays basis.”

Behavioural Change and Waste Minimisation: Respondents advocate for solutions that reduce landfill waste, such as separating food and garden organic waste for composting. Several respondents highlight the importance of promoting behavioural change towards waste minimisation rather than simply providing more convenient waste disposal options like wheelie bins. There is concern that wheelie bins may encourage more waste generation and reduce the motivation for residents to minimize their waste. Suggestions include promoting home composting, providing subsidized compost bins, and investing in education about recycling and waste reduction.

“Easier ways to remove household rubbish is encouraged to reduce pests and eliminate the need for dangerous home burn offs”

“Ban food and organic waste in landfill with massive fines and the food waste/garden collection as a mitigation. Develop composting or other solutions to utilise this organic waste.”

“Many regions are moving towards stricter waste management regulations, and adopting this model now can position Wairoa District ahead of potential future requirements.”

“If this is more widespread across the district, then I would hope fly-tipping costs and costs for having the landfill open as often as it is would reduce.”

“By any chance, can WDC make a collective effort with all local authorities to address waste management with major suppliers of their packaging of food and items to minimise waste across the country?”

Community Engagement and Education: Many respondents stress the importance of community engagement and education in improving waste management practices. Suggestions include educating households on recycling practices and promoting composting at home. Some respondents believe that improved education could be more effective in reducing waste than costly new kerbside collection schemes.

“It would be a better idea to educate the community on having their own composting system. Maybe, a discussion for the MSC, to reach out to marae to help educate whanau. Even involving Mens Shed, to build compost containers for homes - this would be a cheaper option for whanau.”

“Most people have options to deal with green waste in house and it is a cheaper option. Effective education for householders about all recycling including green waste could be better than financing a new kerbside collection.”

Decision 4 - Breathing new life into Wairoa businesses

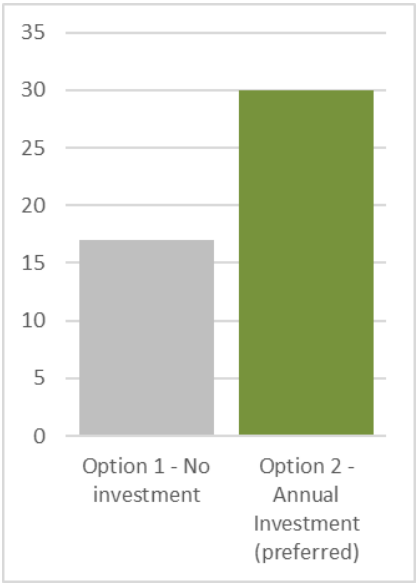

- Option 1 - No investment
- Option 2 - Annual Investment (preferred)

64% of respondents selected option 2.

Overall, while there is support for enhancing Wairoa's business facades and town attractiveness, the responses indicate a cautious approach and emphasise the need for financial prudence and a focus on essential services and infrastructure resilience. There is a clear desire to balance aesthetic improvements with practical measures that ensure long-term economic sustainability and community well-being.

Prioritisation of Essential Services and Recovery: Many respondents emphasise the need to prioritise essential services and recovery efforts, especially in light of recent flooding and other climate-related challenges. They argue that while town beautification and business facade improvements are desirable, they should not take precedence over critical infrastructure and services such as road repairs, stormwater management, and waste management.

“WDC needs to focus on core business of rebuilding better roading, building, resource management, telecommunication, civil defence management projects in the district. Without this, any business will regardless of how pretty they make their shops will suffer.”

“the Council must prioritise essential services and recovery. Pursuing non-essential initiatives at this time is not feasible.”

“Invest in public amenity, but not directly in privately owned buildings.”

“Post cyclone our roads and infrastructure and waste management are a priority. This is a nice to have and should be a discussion but funded once our core services are back to BAU”

Financial Concerns, Strategic Planning and Cost Management: There is significant concern about the financial implications of investing in town beautification projects. Respondents worry about the impact on resident rates and believe that businesses should take more responsibility for maintaining their own facades. Suggestions include exploring alternative funding mechanisms such as optional loans recoverable via targeted rates or ensuring that any investment yields measurable economic benefits to justify the expenditure. Respondents advocate for an economic development strategy that aligns with business needs, tourism promotion, employment opportunities, and overall town improvement goals. There is frustration over perceived delays and lack of coordinated action in previous planning efforts.

“Keep business rates low to encourage businesses instead. If an annual investment is made it could be a contestable fund which pays for improvements to facades after the approved and costed work is completed, but agreed in advance as an incentive. Similar to the Heritage New Zealand Heritage Fabric Protection Grants. “

“Although I agree with the outcome, I don't agree with the tool being proposed to achieve it. There is an opportunity to use this money in a more clever way to achieve the outcomes e.g. loan funding to help things happen with low interest. That would enable the money to be able to achieve much more than what could be with the same \$”

“I see little point in spending big dollars on a glittering town centre, only to see it covered in silt and all the doorways sandbagged every time it rains.”

“Ensure public places infrastructure and maintenance. Promote local businesses.”

Support for Economic Development and Local Businesses: There is strong support for initiatives that stimulate economic vitality and support local businesses. Respondents believe that improving the aesthetics of the main street and North Clyde could attract more visitors, shoppers, and new businesses to Wairoa. They emphasise the importance of creating an attractive environment that fosters community pride and engagement, which in turn could boost tourism and local spending.

“Breathing new life into wairoa businesses means - increased visitors , travelling public reasons to stop and enjoy, activities - a reason for people to stay and purchase from our businesses and yes pride in business buildings and upkeep”

“Businesses on both sides of the bridge are in dire need of revitalization and uplifting. Despite the climate events Wairoa is experiencing, to enhance the town, on both sides of the bridge, will encourage more respect and pride from the community. It may even encourage more traffic to call in for a cuppa rather than just drive through.”

“Improved lighting, footpaths and verandahs could really help the CBD beautification. A cohesive look will improve visitor experience.”

Enforcement of Bylaws and Responsibility: There is a call for enforcing existing bylaws that require building owners to maintain their properties to a certain standard and to be held accountable for the upkeep of their buildings to prevent deterioration of the town's appearance.

“All Wairoa store owners should be aware of the bylaws associated with owning a building. It is essential that these bylaws are enforced otherwise there is no point in having them”

“Most retailers in town do their best to maintain ageing buildings but there are absentee landlords that need to be reminded of due diligence.”

“Building owners need to be held responsible for the maintenance of their own buildings and understand the bylaw.”

“Honestly at the moment i personally believe there are more important things to spend money on. It is up to each individual business building owner to keep their building looking clean and tidy, there is a bylaw that requires this. If all buildings were maintained to the bylaw level, our business area will look a lot more appealing.”

Decision 5 - Protecting Our Taonga - The Future of Our Archives

Option 1 - Keep the archives in Wairoa (preferred)

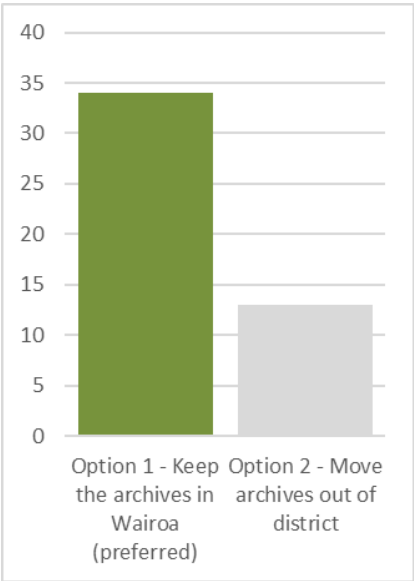

Option 2 - Move archives out of district

72% of respondents selected option 1.

Overall, respondents want to balancing the preservation of cultural heritage against practical considerations of access and cost, and ensuring the long-term security of Wairoa's historical records. Respondents prefer to maintain local access.

Local Accessibility and Cultural / Historical Significance:

Many respondents emphasise the importance of keeping archives locally accessible in Wairoa. They argue that local access fosters community engagement and strengthens connections to heritage and identity. The archives are viewed as more than just records—they are seen as taonga (treasures) that embody the history and culture of Wairoa. Keeping them locally is seen as respecting their cultural significance and ensuring they remain integral to the community's heritage for future generations. Digitisation of records is seen as a viable alternative or complement to physical storage, potentially reducing the need for extensive local facilities while enhancing access. There is also support for collaborative approaches to leverage resources and expertise.

“Current documents need to be kept in Wairoa for ease of access. Historical documents can be digitised by the Knowledge Bank in Hastings for public access. The Knowledge Bank want to establish a presence in Wairoa and this would be a good opportunity to begin these discussions with some koha help for the Council. Knowledge Bank is a voluntary organisation with a huge array of equipment to do this task. The Wairoa Star has recently taken all its archive newspapers to them for digitising for public access. There is no need to reinvent the wheel when such services are already available.”

“Once the records and information leave Wairoa, they will not be returning without a significant increase in the cost. The Wairoa Library would be the most logical choice, as this is what has happened in other centres. The extension to the library would be my choice. ”

“Accessibility for all (ramps, wide doorways, ground floor toilets)”

Safety and Protection of Archives, Financial Considerations and Cost Efficiency: There is significant concern about the costs associated with either keeping archives in Wairoa or moving them to a specialized facility outside the district. Respondents question the financial feasibility of building or upgrading local facilities versus utilizing existing resources like the Knowledge Bank in Hastings for digitization and storage. Some advocate for consolidating archives regionally if it proves to be a more financially viable and secure option. Concerns are raised about the physical safety and security of archives, particularly in the face of natural disasters like floods or fires. Some suggest that moving archives to a specialized facility outside Wairoa could offer better protection, but this needs to be balanced against the benefits of local accessibility and control.

“Attracting and retaining the skills in the region will be a constant challenge even with a better facility. Given the large scale of recovery work Council is faced with, this could be an opportunity to partner with neighbours or other councils to achieve a better outcome. Including looking at more ready access to taonga than what is outlined in the scenario as currently drafted.”

“Keep records in the safest place. Protection outweighs all else. If this needs to be moved outside of Wairoa, I would prefer a consolidation of Hawkes Bay records - keep all Hawkes Bay records in the one place if this presents a financial compromise/benefit for all HB councils. That way, it is still considered & kept local.”

“The management and protection of archives is a bespoke technical skill that is unlikely to be successfully resourced in Wairoa.”

Insufficient information: There is concern from multiple respondents that insufficient information exists to make a decision. Requests for fully costed options in future consultation are made.
“No costings? How do we make an informed decision without \$\$”

“It is not ideal to give options without any information to guide the decision making process.”

“I find it hard to choose either option here without more context.”

“There is no data to make an informed decision for Decision 5. Keep current documents in Wairoa for ease of access is preferred - but at what cost? Historical documents can be digitised by the Wairoa Museum or Knowledge Bank in Hastings for public access.”

Other feedback

There were a variety of responses which demonstrated a community-driven desire for sustainable growth, enhanced resilience, and inclusive economic development that preserves and celebrates Wairoa's unique cultural identity and natural assets. The feedback highlighted a need for strategic planning, transparent governance, and community involvement to effectively address current challenges and capitalise on future opportunities.

Infrastructure and Environmental Resilience: There is a strong emphasis on enhancing infrastructure resilience, particularly in response to recent weather events like floods. Suggestions

include implementing long-term flood protection measures such as stop banks and dredging the river mouth, which are seen as critical investments to safeguard the town and encourage economic stability.

Community Engagement and Transparency: Many respondents highlight the importance of community engagement in decision-making processes. They advocate for transparency in how decisions are made and how funds are allocated, particularly concerning rates increases and the prioritisation of projects. There is a call for more robust consultation to ensure that community needs and preferences are adequately addressed.

Economic Diversification and Tourism Promotion: There is a consensus on the need to diversify the local economy and promote tourism. Ideas include developing attractions such as Railbike Adventures, creating cultural and heritage tours, and hosting festivals and events (like a Māori food festival or storytelling festival). There is also support for enhancing existing facilities like the Nūhaka Domain to attract visitors and improve local amenities.

Financial Management and Prioritisation: Concerns are raised about the financial implications of proposed projects and plans. There is a desire for fiscal responsibility and prioritisation of essential services and infrastructure upgrades over non-essential initiatives. Some respondents express frustration with perceived misallocation of resources and call for a more strategic approach to budgeting and expenditure.

Sustainable Development and Innovation: Respondents advocate for sustainable practices and innovation in infrastructure development. This includes smart regulations on urban planning, waste management, and energy efficiency to reduce environmental impact and enhance community resilience. There is also support for exploring renewable energy options and promoting local sustainability initiatives.

Historical and Cultural Preservation: Several respondents emphasise the importance of celebrating Wairoa's cultural heritage and promoting local history. Suggestions include revitalizing historical sites like Pilot Hill, creating public displays honouring local figures, and improving the readability and accessibility of cultural heritage plaques and landmarks.

Practical Solutions and Collaboration: Practical solutions such as seeking external funding through grants and partnerships, particularly for disaster recovery and infrastructure projects, are recommended. There is also support for collaborating with neighbouring Councils, government agencies, and community organisations to leverage resources and expertise.

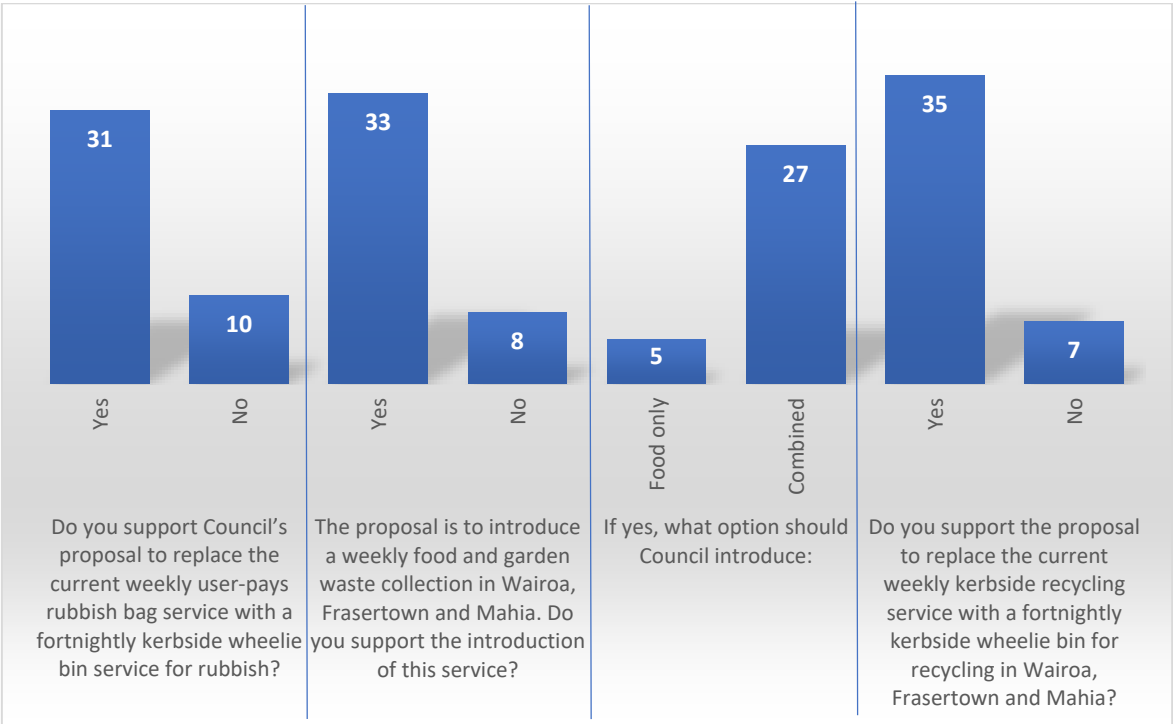

No Time to Waste submissions analysis

This report summarises the feedback received for each consultation item, along with other, more general feedback received through the submissions process. The consultation had single response tick-boxes, allowing respondents to select their preferred option for each consultation topic, but also allowed free-text responses to provide additional comments related to the consultation. These responses were reviewed to identify key themes, concepts or issues within submitted feedback.

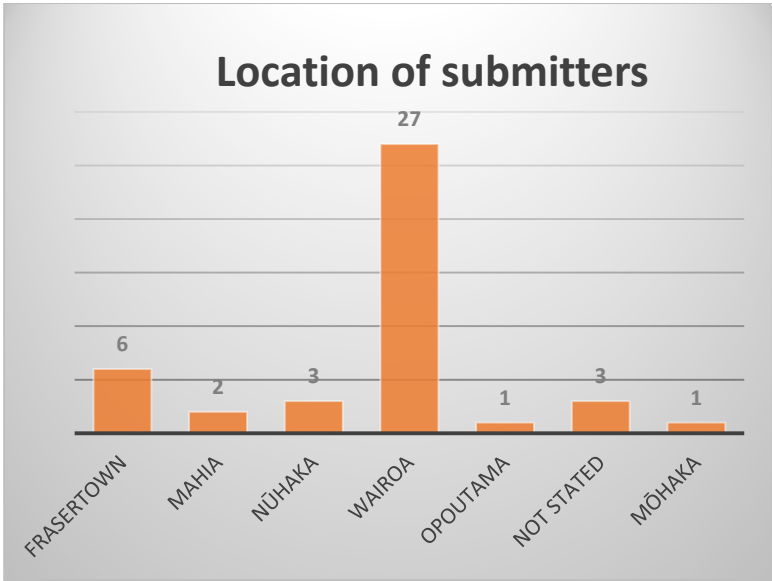

The No Time to Waste consultation received 43 online submissions. All responses were individual (not on behalf of a group or organisation). 3 respondents expressed their willingness to speak in-person in support of their submission (7%).

The submissions showed a clear preference in all questions.

Do you support Council's proposal to replace the current weekly user-pays rubbish bag service with a fortnightly kerbside wheelie bin service for rubbish?	Yes	31	76%
	No	10	24%
The proposal is to introduce a weekly food and garden waste collection in Wairoa, Frasertown and Mahia. Do you support the introduction of this service?	Yes	33	80%
	No	8	20%
If yes, what option should Council introduce:	Food only	5	16%
	Combined	27	84%
Do you support the proposal to replace the current weekly kerbside recycling service with a fortnightly kerbside wheelie bin for recycling in Wairoa, Frasertown and Mahia?	Yes	35	83%
	No	7	17%

Although 62% of submitters were located in the Wairoa township, responses were received from across the district. There were three submissions that did not state their location.

Overall the key themes across all comments were as follows:

Cost Concerns and User Pays Preference with Opt-in Flexibility and Customization: Many respondents are concerned about the potential cost implications of the proposed changes. There is a strong preference for a user pays system rather than funding through rates, with concerns about fairness and the financial burden on households, especially those producing minimal waste. Respondents consistently express a desire for flexibility and customisation in the service. There is a preference for an opt-in rather than compulsory system, giving individuals more control over whether to participate.

“I would expect that user pays means each bin is allocated and coded - user pays only if [wheelie] bin is put out.”

“User pays only- a no brainer”

“Ensure this is a user pays system! I should not be funding the removal and processing of someone else's rubbish be it green or otherwise through my rates!”

“I would support this idea if it was optional but I am absolutely against making this compulsory and part of the rates fees.”

“I support it in an opt in basis only and households should have the option of different sized bins and different pick up frequencies to meet their needs. I currently share a wheelie bin service with my neighbour and eve then we often don't have enough waste to justify a weekly pick up.”

“We compost and have chickens so are there opt out options for un-necessary bins with reduced prices for opting out”

“Some of us produce very little rubbish so these initiatives would punish those of us who only buy soft plastic recyclables and send it away for recycling. I purposefully seek out and use products that require almost zero waste for kerbside collection. This initiative being loaded on to already very high rates would punish others who try as hard as I do to be zero waste”

“We only fill a bag every 3 weeks and compost all our food scrap. So that is a NO for me.”

"We have nil waste. We compost all food scraps which is very minimal anyway. Recycle.... We should not be paying for others when we make an effort to be pro active!!"

Support for Recycling and Sustainability: Despite concerns about costs and logistics, there is widespread support for improving recycling and waste management practices. Respondents value initiatives that promote recycling, composting, and reducing landfill waste. There is also interest in incentivizing good environmental practices through credits or rewards for recycling correctly.

"I would actually prefer you give people compost bins first and help them grow their own food using their compost."

"If you are collecting food and garden waste to make compost then allow the community to earn credits for buying the compost, or credits to earn garden boxes, seeds etc... Involve kura and schools, run events, have competitions."

"Keen az for this as a home owner, I'm all about recycling and doing the right thing"

"We need to incentivise good tikanga taiao"

"The Council used to have a shredder at the dump and we could buy the shredded green waste to put on our gardens. It would be great if this could be done again."

"Is the green and kitchen waste going to be composted or simply dumped. I would support a composting system."

Community-Specific Needs and Logistics: Specific community needs and logistical considerations are highlighted, such as the inclusion of remote areas like Nūhaka, and the logistical challenges faced by residents with long driveways or rural settings. There is also a call for clear communication about how the changes will be implemented and what options are available to residents in different areas.

"Here in Nuhaka we have to take it to a collection point, it would be nice to have bins that are collected at our gate."

"We would love to have our rubbish collected from Awamate Road!! As a mum of 3 under 3, I can never get to the landfill and we have our own wheelie bins but this would make my life a lot easier. It's says Frasertown as a collection point and my address states Frasertown, however they won't collect my rubbish."

Q14

Solid waste management and minimisation - Additional comments

Long Text

by keeping waste management local we have greater incentives as a community to strive for waste minimisation and reuse. And this option keeps investment in the District, so contributing to economic development and also reduces land transport of waste via road with added burden on the roading system.

Q15

Decision 3 - Kerbside Collection

Q16 Kerbside Collection - Additional comments

Long Text

The provision of wheely bins in place of user-pays rubbish bags seems at odds with the background statement of Decision 2 'We need people to take responsibility for their own waste generation and actively be better kaitiaki.'

I disagree with the idea of the council funding the provision of wheely bins. Research in the UK has shown that these more convenient containers in fact encourage more waste generation. Wheely bins act as a deterrent to waste minimisation as its too easy to skip it in the bin. Thus more waste is generated.

There is also a high up front cost to the bin supply. Harder to achieve is a behavioural change towards waste minimising behaviour.

Home composting should be supported over the provision of brown bins. Most Wairoa households have gardens and providing subsidised compost bins along with home composting promotion initiatives would be a better long term solution than the expense of collecting and transporting green waste. There is no detail or costing of the management of the green waste once it is collected. How will it be managed for anaerobic compost production and at what cost?

Would be great if this important resource was protected and locally accessible

Q21 Any other feedback

Long Text

Protecting our natural environment - He Oranga Taiao – a protected, restored and connected environment.

Page 16 of the consultation document (Challenge 6) is about protecting our natural environment. I would like to see more detail about initiatives to enhance our unique local ecosystems and taonga species. The awa has many areas where weeds are taking over from natural vegetation. Native riparian plant species are most effective at maintaining river bank stability, whilst also contributing to biodiversity and local distinctiveness. Weed control and staged native planting of new areas of the river bank or council reserves as part of a long term programme would contribute to the stated strategic direction 'environmental wellbeing of the district now and in the future' and the outcome He Oranga Taiao – a protected, restored and connected environment. Some work could be done with the help pf community partners, such as the Ngahere Community Nursery and the Wairoa Awa Restoration Trust.

Sustainable land use in the wider river catchment should be encouraged by policy development to limit conversion to forestry on erosion prone land and ensuring rules are in place for very careful harvesting of existing exotic forestry in order to minimise silt and slash entering the river.

Funding should be directed to achieve these aims. And a percentage of the \$1.5M secured through Kānoa – regional investment for Wairoa riverbank restoration should be spent on retiring and restoring land for flood protection to act as a 'green sponge' with water retention and biodiversity benefits.

Q16 Kerbside Collection - Additional comments

Long Text This will cost ratepayers more but with services such as these it should be on a user pays basis. I agree with Craig re education for householders about all recycling.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 2 - Annual Investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text This topic has been on the agenda now since 2011 - Upstream Constitution. A main street colour plan was prepared by the Council in 2013. Lee Neville and I presented an outline of a plan under the Great Things Grow Here banner in 2016. Jenny Gilford has produced a number of reports (at a huge cost to the Council) between 2018 and 2022. We are still talking about it with actually NO ACTION taking place. The key ingredient missing in all of this is an Economic Development Plan that outlines a series of action plans, timelines and budgets. Everything else will be a scattergun approach without a plan and short, fine-tuned action plan that takes into account business needs, tourism, and employment opportunities, business attraction, signage, appearance and pride of place (well-being). It must also include a plan for North Clyde for example: a light industrial business park/ recycling industries (including metal such as old cars etc. / bio-fuel production (from slash), and other options including green space.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 2 - Move archives out of district

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text Current documents need to be kept in Wairoa for ease of access. Historical documents can be digitised by the Knowledge Bank in Hastings for public access. The Knowledge Bank want to establish a presence in Wairoa and this would be a good opportunity to begin these discussions with some koha help for the Council. Knowledge Bank is a voluntary organisation with a huge array of equipment to do this task. The Wairoa Star has recently taken all its archive newspapers to them for digitising for public access. There is no need to reinvent the wheel when such services are already available.

Q21 Any other feedback

Long Text Write, agree, approve, budget and timeline a long-term Economic Development Plan for Wairoa. External consultants NOT required.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 2 - Annual Investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text breathing new life into wairoa businesses means - increased visitors , travelling public reasons to stop and enjoy, activities - a reason for people to stay and purchase from our businesses and yes pride in business buildings and upkeep. It is time (although challenging given the past two years) for the riverbank and mainstreet areas to be developed. Our public spaces are very tired, gardens need revitalising, new plantings. I understand there is an ineffectual committee in place for this. It is time for a project manager to be appointed and move forward.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 1 - Keep the archives in Wairoa

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text

Q21 Any other feedback

Long Text Reinstatement of the PILOT HILL HERITAGE RESERVE MANAGEMENT PLAN 31.3.2010. This plan was commissioned in 2010 and quite clearly shelved. Time for this to be actioned - the "hill" restored and protected from further erosion and site developed.

RAILBIKE ADVENTURES. Discussion needs to take place with this business. It MUST get up and running. This is the perfect catalyst this district needs to invigorate the tourism/visitor /business /accommodation sectors. I am sure a deal can be met with reduced rates for a specified time and a commitment from them on longevity. This corridor also needs to include a cycle/walking track with offshots to the 12 apostles, whakaki lake - birdwatching, eel feeding etc. This is exactly how the otago rail trail started many years ago. Our district is boring and lacks reasons for people to come. The closing of the hotpools at Morere has meant a loss of business to us at Nuhaka to the extent of \$1000 per week.

CELEBRATING OUR FAMOUS PEOPLE. We do not (other than the museum) have any public displays or statues of our exceptional people - George Nepia etc. It would be fabulous to have this included at the village green or amongst the walkway .

EQC Levies. I know this is outside the brief but it is time a discussion started about the effective and fair allocation of the EQC levy. As we know there is a small uptake of insurance cover in this and many districts like ours. This allocation needs to be shifted to property titles and collection from every property in NZ . It is also quite an affront to those who take responsibility of insurance that those uninsured have received better treatment in this district due to the flooding events. There needs to be a small repayment scheme setup back to the govt funding system so that every event in future can be well supported.

thank you Wendy

Multi Choice

Q9

Tautoko Wairoa | Buying Locally

Multi Choice

Option 1 - Maintain status quo

Q10

Tautoko Wairoa | Buying Locally - Additional comments

Long Text

The purpose of council is not to support selected business by spending with them - its job is to support ALL business by providing services to the town which allow us to operate to the best of our abilities and grow. When employing contractors Wairoa should use the business that provides the highest quality outcome within the budget available. Wairoa businesses need to compete on a level playing field to ensure high quality services are available to this town. If you employ more business from out of town we might be able to access for example, tradies, in a timely manner to enable the town to progress. People still aren't in their houses from Cyclone Gabrielle, are in cold houses as they cannot get skilled labour to install fireplaces. There is plenty of private development planned in this town, we just cannot attract the skills to get it done and keep the money-go-round turning. Wairoa District Council has a reputation of being incredibly difficult to deal with in both Hawkes Bay and Tairāwhiti.

Q11

Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice

Option 2 - Rectification + BAU + Targeted improvement

Q12

Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

Please do not use acronyms when seeking feedback from the general public! BAU???
You will have to improve to the road networks in order for this region to survive

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 1 - Development of a New Landfill Cell

Page 12 of 19

Long Term Plan Submission Form

Q14 Solid waste management and minimisation - Additional comments

Long Text I cannot comment on landfill as I have no information about the impacts, both economic and environmental, on this subject. Surely it is the job of council to investigate this, present the information and make the decision that is best for a ratepayers

Q15 Decision 3 - Kerbside Collection

Multi Choice Option 1 - Business as usual

Q16 Kerbside Collection - Additional comments

Long Text Kerbside collection is not going to stop the fly tipping and the serious littering issue this town faces. Why doesn't the council start enforcing the bylaws that already exist to prosecute those who are letting us down. The community can police littering and WDC needs work in with schools to improve education
People who care about their local environment are already trying their best to reduce waste, but potentially cannot afford additional rate costs

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 1 - No investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text The Gemmells building overspend fiasco is evidence that WDC lacks any connection with established business owners and has no understanding of how to grow a local economy. I don't think the rate payer can afford to subsidize any further spending by council employees that do not have the qualifications and skill level to manage these projects

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 1 - Keep the archives in Wairoa

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text Why are physical records not being digitized?
Taonga should 100% remain in Wairoa. This town desperately needs more of its history (particularly Maori) represented so we can all learn the history of this region and offer tourist a greater understanding of Maori culture. we have a library facility where paper books are becoming obsolete and have a fabulous little museum - look at the potential here!

Q21 Any other feedback

Long Text I am very concerned If this is all that you consider a long term plan requires

Multi Choice

Q9

Tautoko Wairoa | Buying Locally

Multi Choice

Option 1 - Maintain status quo

Q10

Tautoko Wairoa | Buying Locally - Additional comments

Long Text

As much as all ratepayers and residents would like to buy locally, some resources are not available. Being economically prudent, one must seek better costs in the competitive market (online shopping). My preferred option for WDC is to ensure this is covered competitively in Finance, Assurance & Risk committee policies and procedures.

Q11

Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice

Option 2 - Rectification + BAU + Targeted improvement

Q12

Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

I don't agree with either options as the costs far outweigh the collective economic base of most Wairoa ratepayers. WDC were advised in 2016 at local body elections, Ministry for the Environment Land Inquiry public meeting by me of coastal erosion and NO-ONE listened. As far as I'm concerned, NO ratepayer or taxpayer funds should continue to finance QRS project and staff budget blowouts who have literally milked the recovery funding process.

I had to choose option 2 because the electronic version wouldn't let my submission go through, but I'll stick with no options

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 2 - Out of District Disposal

Page 6 of 19

Long Term Plan Submission Form

Q14 Solid waste management and minimisation - Additional comments

Long Text

Both options are not going to be well received by the community at the costs given. Why weren't options explored earlier regardless of the flood items impacting the current site. Restore the mana of the people and explore uninhabitable, unused land in Wairoa to ensure the mana of the land is beneficially utilised for the community.

I had to choose option 2 because the electronic version wouldn't let my submission go through. Short term option 2. Long term option 1.

Q15 Decision 3 - Kerbside Collection

Multi Choice

Option 1 - Business as usual

Q16 Kerbside Collection - Additional comments

Long Text

Stands to reason as the content for this decision is not appealing to me. I know I do not want my weekly rubbish collection collected fortnightly for blowflies to expand their population. Currently, I already use recycling which could be extended to fortnightly with greenwaste. Food scraps are collected by whanau for weaners.

By any chance, can WDC make a collective effort with all local authorities to address waste management with major suppliers of their packaging of food and items to minimise waste across the country?

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice

Option 1 - No investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text

A no brainer - as a business owner, that is an operational and capital expense.

WDC needs to focus on core business of rebuilding better roading, building, resource management, telecommunication, civil defence management projects in the district. Without this, any business will regardless of how pretty they make their shops will suffer.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice

Option 2 - Move archives out of district

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text

WDC barely maintains a safe place for people with flood risks of our waterways so before our Wairoa history literally gets swept away, pays to be safe to store everything with National Archives.

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text

There needs to be an economic development strategy in conjunction with the Wairoa Business Association. Sam Jackman is very happy to be involved as he has the expertise from Havelock, Taradale and Hastings which could easily be utilised here. I think the plans for revamping Marine Parade and North Clyde would be great, as they are both truly grotesque, but needs to be seen as the first step in an overall strategy. It would be great to develop a tech hub in North Clyde.

In the revamp, if you could keep in mind the needs of the disabled community or consult with me, I would be very grateful. We have an accessibility specialist, Michelle Lucas who would welcome the opportunity to talk with you. The bricks that grace the footpaths are extremely uneven in places and hazardous for blind, low vision and those in wheel chairs. It would be fantastic to have user friendly community spaces which are wheel chair friendly (as well as playgrounds). The amazing digital hub in the library is inaccessible to wheel chairs and excludes the children and adults I support from accessing the courses such as 3D printing, when they want to be included as part of the group. I hope the new Isite is accessible and wheel chair friendly with spaces to meet and for more community interaction.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 2 - Move archives out of district

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text

Use the knowledge bank, the old fire station looks like it's about to collapse, as does the old church and the black street hall.

Q21 Any other feedback

Long Text

Wairoa has a fantastic community and a proud culture. It needs to be brought more visibly into Marine parade, included in a culture history journey, from the Wairoa Museum, taking visitors on a history tour. The current plaques are red stone with gold lettering and are unreadable so if they can be revamped too that would be great. I have always advocated for story telling festival and murals throughout town to capture the culture. A Maori food festival tied in with the Maori film festival, once the Morere pools are functioning would help to pull in more visitors and keep them staying longer.

Q9 Tautoko Wairoa | Buying Locally

Multi Choice Option 2 - Purchase from local business on a case by case basis

Q10 Tautoko Wairoa | Buying Locally - Additional comments

Long Text

On a case by case basis seems both manageable while keeping all options open (both through all-of-government and purchasing local). Balance between supporting local and being financially prudent.

Q11 Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice Option 2 - Rectification + BAU + Targeted improvement

Q12 Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

In favour of option 2, seems like we're always playing catch up.

Q13 Decision 2 - Solid waste management and minimisation

Multi Choice Option 1 - Development of a New Landfill Cell

Q14 Solid waste management and minimisation - Additional comments

Long Text

In the immediate future I see the advantages of out of district disposal. In the long run (long, long run) option 1 seems more logical. I don't see how a transfer station creates a greater focus on waste minimisation more so than what is described as option 1. Ultimately, everybody needs to create less waste which will be a great challenge that cannot be achieved by either option alone. I see waste management as simply another cost, everybody creates waste and that needs to be managed. Ultimately, I try to reduce, recycle, reuse etc. as much as possible for the betterment of the planet. Eventually, with all waste significantly minimized the cost will go down for people, which is true for both option 1 and 2.

Q15	Decision 3 - Kerbside Collection
Multi Choice	Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections
Q16	Kerbside Collection - Additional comments
Long Text	Very much in favour of option 2, this would be a massive step in the right direction in terms of waste minimisation, not to mention all other advantages the wheelie bins bring (speaking from experience knowing little else than wheelie bin kerbside collection + landfill for those times you have an abnormal amount of waste/white ware items etc.).
Q17	Decision 4 - Breathing new life into Wairoa businesses
Multi Choice	Option 2 - Annual Investment
Q18	Breathing new life into Wairoa businesses - Additional comments
Long Text	Very much in favour of option 2 as outlined. However, I think this would only work well through active support from the Council with streamlined processes and clear design guidelines and so on.
Q19	Decision 5 - Protecting Our Taonga - The Future of Our Archives
Multi Choice	Option 2 - Move archives out of district
Q20	Protecting Our Taonga - The Future of Our Archives - Additional comments
Long Text	I find it hard to choose either option here without more context. Thoughts of what it could be like to have a new/upgraded archives facility and what that could mean in terms of visiting/viewing, other options such as digitizing records in addition to a local facility and local support for questions/queries, all quite exciting stuff... I guess this could be covered in a detailed plan in a future consultation.

Q9 Tautoko Wairoa | Buying Locally

Multi Choice Option 1 - Maintain status quo

Q10 Tautoko Wairoa | Buying Locally - Additional comments

Long Text

With AOG purchasing power WDC can lower admin costs which then frees up more money to put into targeted economic development actions or lower rates, which supports local businesses too. Although we want to support our businesses, savings of up to 80% of retail price due to the bargaining power of the AOG represent the most efficient and prudent use of the funds that ratepayers have entrusted WDC with in their rates. Local business is still used in many cases and if a business requests or provides items and the price comparison and service offered is similar to buying elsewhere then yes. But the Council must deliver value for money for all ratepayers and utilising the AOG buying power is the best way to do this.

Q11 Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice Option 2 - Rectification + BAU + Targeted improvement

Q12 Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

Yes but please apply to the infrastructure fund for this or consider targeted tolls (forestry/rocekt lab perhaps). The improvement to the road network is a matter of public safety, economic development and ensuring our town can thrive. If the roading network remains fragile we will struggle to attract and retain investment, people and tourists. Please don't let highways around the big cities get priority funded over our roads.

Q13 Decision 2 - Solid waste management and minimisation

Multi Choice Option 1 - Development of a New Landfill Cell

Q14 Solid waste management and minimisation - Additional comments

Long Text

Utilise the silt funding (which will otherwise be lost as it cannot be repurposed) to develop this non-BAU cell construction required approx 6 years early due to the flooding events. Waste to energy utilising our prevalent slash may also be an option, especially given it would also improve wairoa's resilience by providing a bespoke electricity option for the town, without the transmission risk in future weather or disaster events. Surely the coalition government's alternative electricity programme could assist in funding for a town-sized scheme. Waste minimisation efforts can still be focused on if the slash can be utilised in this facility.

Out of town disposal has massive risks with infrastructure - if the road is closed then we need to store the waste here. We also have no control over costs and no guarantee that we have ongoing access to other facilities. We will face huge risks if those facilities hike prices or stop the service, and we are left scrambling to find an alternative. If building a new cell we need ruthless waste minimisation schemes: ban all organics. Ban single use coffee cups. Ban food packaging /takeaway boxes - there are awesome examples of banana leaf and woven food packaging options. Set an example for the rest of NZ with the revolutionary policies and strategic vision but this requires decisive action.

Q15 Decision 3 - Kerbside Collection

Multi Choice

Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections

Q16 Kerbside Collection - Additional comments

Long Text

Ban food and organic waste in landfill with massive fines and the food waste/garden collection as a mitigation. Develop composting or other solutions to utilise this organic waste.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice

Option 1 - No investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text

Post cyclone our roads and infrastructure and waste management are a priority. This is a nice to have and should be a discussion but funded once our core services are back to BAU

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice

Option 2 - Move archives out of district

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text

Wairoa does not have the specialised staff to maintain these archives. Nor is there any facility meeting all the archival storage standards. Moving these out of district to a specialised facility will provide the best option for protection and access going forward. To build a facility is frivolous at best in the current economic and recovery climate

Long Text

Keep local to try to minimize road usage and costs to rate payers. WDC has a consented dump so should try to keep that. Smart environmental should not have the contract as they are continually increasing their costs unfairly. Another local company could make a profit from this rather than a couple of Aucklanders.

Long Text

A sustainable township involves investing in the local business, local people in order to develop a resilient community. This should involve all of the community in order to create local pride in the township. Create a "share an idea"environment that the council can draw on to hear the views of the people. When an idea comes up that is supported by many, go to the next step as to how will we fund, with the support of the people. Is it fund raising, rates, loans, community engagement. The Council is off to a good start with this submission, but not everyone will be able to do this.

You may well be able to get buy-in in the way of charity from paint manufacturers & the like for supplies, (they will be able to write the donation off, while also recieving recognition which is a double whammy in advertising the doners)

Just as we have Marae DIY why not bring in as many volunteers, even those who whakapapa like myself would love to be involved in whatever capacity one is capable.

Get the idea out onto social media so that will encourage larger players who can donate in whatever way they can.

Long Text	Wairoa having a high Maori population could make a beautiful town highlighting the culture especially along the riverbank nga Po as it is along the shoreline of Kaikoura. Picnic tables , pagodas and signage as to places to see around the area & where to view our taonga which should have a safe secure home in te Wairoa. Dredge the river and make it a feature waka racing and bring back some of the life as it used to be. Utilize the shingle /sludge out of the river bed to build up where needed & plant it up, pave some... lots of potential here, limited only by the mind.

Q10

Tautoko Wairoa | Buying Locally - Additional comments

Long Text

Where a local business can compete on value and/or associated service provided it is important to tautoko them as part of achieving the broader community outcomes. If it unnecessarily increases costs for things that don't add value to Council services and activities (e.g., pens!), it is better to go for the lowest cost given all of the challenges our district faces and direct the funds elsewhere.

Q11

Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice

Option 2 - Rectification + BAU + Targeted improvement

Q12

Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

There is no AMP or draft Infrastructure Strategy available to inform choosing between the options as to what is meant by safety and resilience improvements and how this would be prioritised/ or where they are. Whilst I agree they are needed in principle, it is unclear how value add would be achieved across the network and what improvements would be the best "bang for buck" and how this would play out under this scenario.

Suggest further work is needed in this space or made available to the public to enable trade-offs to be made.

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 1 - Development of a New Landfill Cell

Page 26 of 93

Long Term Plan Submission Form

Q14	Solid waste management and minimisation - Additional comments
Long Text	Given recent events there are some real opportunities as the "East Coast" to collaborate and deliver good quality and better economies of scale. With the current consent we have some real advantages with the landfill farm that other areas do not.
Q15	Decision 3 - Kerbside Collection
Multi Choice	Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections
Q16	Kerbside Collection - Additional comments
Long Text	If this is more widespread across the district, then I would hope fly-tipping costs and costs for having the landfill open as often as it is would reduce. It is unclear whether that has been included in the assumptions in the absence of an AMP or draft Infrastructure Strategy, and the 2018 Financial Strategy is the one available on the consultation website (I hope this is a mistake!) which is woefully out of date and therefore also doesn't provide any further info re assumptions on financial forecasts.
Q17	Decision 4 - Breathing new life into Wairoa businesses
Multi Choice	Option 2 - Annual Investment
Q18	Breathing new life into Wairoa businesses - Additional comments
Long Text	Although I agree with the outcome, I don't agree with the tool being proposed to achieve it. There is an opportunity to use this money in a more clever way to achieve the outcomes e.g. loan funding to help things happen with low interest. That would enable the money to be able to achieve much more than what could be with the same \$, and result in change being enabled over a longer time period as well.
Q19	Decision 5 - Protecting Our Taonga - The Future of Our Archives
Multi Choice	Option 2 - Move archives out of district
Q20	Protecting Our Taonga - The Future of Our Archives - Additional comments
Long Text	<p>Attracting and retaining the skills in the region will be a constant challenge even with a better facility.</p> <p>Given the large scale of recovery work Council is faced with, this could be an opportunity to partner with neighbours or other councils to achieve a better outcome. Including looking at more ready access to taonga than what is outlined in the scenario as currently drafted.</p>
Q21	Any other feedback
Long Text	<p>It was really disappointing to see the information available for this consultation given the issues and challenges our district faces. I understand the content wasn't audited as it normally is however, I would have hoped there still would have been the key information available to help inform submissions. For example, no draft Infrastructure Strategy - plus there is no substantial mention in the CD of it either, unless the "Our challenges" section is meant to reflect the significant infrastructure issues required in the strategy.</p> <p>Of particular note and disappointment is the 2018 Financial Strategy being the FS on the consultation website - this is really out of date and totally irrelevant in the current operating environment and proposed rates increases etc. It is also at odds with the brief content available on the FS in the CD document.</p> <p>From the outside looking in, staff numbers in some areas are disproportionate to the LOS, workload and outcomes being achieved. Diverting existing FTE to other priorities would be beneficial to achieve outcomes with little change to the total FTEs employed. Innovation and a focus on ways of working differently need to underpin continuous improvement, WDC is a small council with an incredibly large work programme and I cannot see through the CD how realistic it will be to achieve based on the status quo resourcing and tools available.</p> <p>I also hope that some reflection and rethinking is done around the June flood and the additional recovery demands needed to inform the final Three Year Plan, Financial Strategy, and Infrastructure Strategy.</p>

Q9 Tautoko Wairoa | Buying Locally

Multi Choice Option 2 - Purchase from local business on a case by case basis

Q10 Tautoko Wairoa | Buying Locally - Additional comments

Long Text

Locally available services and locally produced products should be prioritised, but obviously, assessed for fairness with respect to fees charged and also quality.

Q11 Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice Option 2 - Rectification + BAU + Targeted improvement

Q12 Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

Q13 Decision 2 - Solid waste management and minimisation

Multi Choice Option 1 - Development of a New Landfill Cell

Q14 Solid waste management and minimisation - Additional comments

Long Text

Opening the new landfill cell is preferable as the district requires a functional landfill even in times of extreme weather when the roads north, south and west might all be shut.

Further, our geography - with all those hills - makes the trucking of waste outside the district a terribly inefficient proposition. What, for example, would the figures look like if the fuel price suddenly doubled?

The prospective new cell should be the last cell ever required. In the long term all products which cannot be recycled or composted could be processed in a waste to energy plant as is already done overseas. These plants operate at

high temperatures (thousands of degrees) and meet strict emissions standards, while generating electricity for their localities.

Q15 Decision 3 - Kerbside Collection

Multi Choice Option 1 - Business as usual

Q16 Kerbside Collection - Additional comments

Long Text Option 2 sounds great on paper but might fall down in practice because people will not take the responsibility to sort their rubbish properly even with the separate wheelie bins proposed. The user pays system at least encourages people to recycle (because it costs them not to), and at the transfer station they are watched to a reasonable degree (and helped where needed) to put their recycling in the right bins, remove the bottle caps, etc etc.

My experience in South-East Australia where wheelie bin kerbside recycling & waste collection has been in place for some time now is that food ends up in the recycling, plastic in the green waste/compost, recycling mixed with the general waste, etc etc. What provisions will council make for public ignorance?

A happy middle ground would be to:

a.) Keep the system as it is (user pays for general waste) but fit out the transfer stations for handling food waste. People can drop off their food waste with their recycling.

b.) Continue to offer very reasonably priced (or free) wheelie bin collections for pensioners.

c.) Put a little aside to have a team/contractor that regularly cleans up after illegal dumpers.

d.) Invest the difference in R&D into a waste to energy plant and/or a plastic to diesel oil plant (both already in existence).

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 1 - No investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text Not because we don't want a beautiful and thriving built environment, but because the minor investment won't in the long run turn the tide of degradation that is ultimately a symptom of national (and global) economic stagnation.

Invest in public amenity, but not directly in privately owned buildings.

Allow owners, within reason, to self direct themselves with their properties thus fostering diversity.

Wairoa is a real town: not a town, and not a people, that play charades (ie: a focus of looks over substance). Quite the opposite.

Council's focus would be better directed at the systemic causes of stagnation that lead to poorly maintained buildings, homelessness, struggling small & medium businesses and the demise of local manufacturing. An NZ group with economic ideas for a more resilient NZ is: <https://positivemoney.org.nz>.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 1 - Keep the archives in Wairoa

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text If option 2, where the records are stored out of town and thus not easily accessible to residents in-person then why can't there be an option 1 where the public only have limited or digital only access to the archives while the archives remain in Wairoa in a reasonably suitable facility?

Q21 Any other feedback

Long Text Please focus on making the district more resilient by considering: fuel for essential services - eg: waste plastic to diesel oil, energy (wood slash to wood alcohol), local skills, community building, community preventive health initiatives and in general looking after our people.

Resilience can be achieved by making the assumption that centralised systems will become harder to maintain as the 21st century progresses and that oil & gas will become considerably more expensive.

Smart regulations on composting toilets (with adequate facilitation and encouragement), wood burners, water storage, waste management, urban farming and off-grid construction can relieve infrastructure burdens and

insulate the town from outages and shortages.

Community housing trusts (Iwi led: purpose driven not profit driven) and a community member owned home insurance company (again, purpose over profit) could further bolster our community; the latter probably requiring a membership base outside of Wairoa too for the numbers to stack up...

Inappropriate at this juncture to be removing access to quality discounts at a time where fiscal restraint needs have never been more evident no matter how much we would love to tautoko local.

Q11

Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice

Option 1 - Rectification + BAU

Q12

Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

Nice to have are unaffordable .. we all understand that our fragile roads and under investment over decades has led to infrastructure issues, some of them significant but nobody I know can build back better we are all just trying to get back to business as usual

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 1 - Development of a New Landfill Cell

Q14

Solid waste management and minimisation - Additional comments

Long Text

NEITHER OPTION is my preferred selection .. as kaitiaki the focus must be on minimising waste, encouraging business to provide zero waste options and if that is impossible purchase responsibly. Individuals need to take responsibility but if they don't have adequate option to do so from local businesses then that needs addressing.

Page 41 of 93

Long Term Plan Submission Form

Item 5.1- Appendix 3

Page 71

Q15 Decision 3 - Kerbside Collection

Multi Choice Option 1 - Business as usual

Q16 Kerbside Collection - Additional comments

Long Text Huge misread of the room! Not everyone uses the current kerbside collection so making them pay through the nose via rates is removing any and all incentive to live sustainably and work towards zero waste. Enormous bins to store and charged even if not collected .. you've missed the mark on this one. No wonder you need another landfill with this level of encouragement for households to bin more. This is a classic example of the appropriateness of User Pays not charge everyone for something that many won't use

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 1 - No investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text Perhaps you should have made better use of the PGF and supported all businesses rather than rebuild one site for one business. Time delays and budget blow outs aside we deserved way better than a cafe with inadequate public seating for anyone wishing to stop and enjoy the view of our awa. The planning and public consultation for that rebuild was certainly different to the eventual outcome.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 1 - Keep the archives in Wairoa

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text What century are we working in ... digitise archives and paper records. Have we learnt nothing from recent weather events? Let's put our taonga somewhere outside of the district yet still at risk of fire/flood/destruction (insert facepalm emoji here). What happened to Tautoko Wairoa?

Q21 Any other feedback

Long Text I love Wairoa .. wouldn't want to live anywhere else and have had significant upheaval from both Cyclone Gabrielle and the June flood with our own home and our daughters home uninhabitable. Nobody I know here is in a position to do anything other than maintain status quo and yet our rates keep skyrocketing, continued increases will force fixed income folk out and create enormous financial anxiety. Council representatives misspoke at public meetings (and misquoted online predictions) regards the switch to capital value would reduce rates and make the system more fair. I no longer trust that council table and I am not alone. If the people that elected you can't make ends meet then what on earth is going on that we are being asked to fund beautification and sexy roads. I'd like my home to be liveable and an adequate road these days. I am not a happy citizen of Wairoa

Q12

Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

The cost increase is minimal between what is necessary for today and what is needed to future proof the land transport network.

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 1 - Development of a New Landfill Cell

Q14

Solid waste management and minimisation - Additional comments

Long Text

Develop a new site and incorporate future technologies such as capturing the methane gas to power generators. This has already been done in Auckland, so there will be no need to reinvent the wheel as all of the hard yards have already been done. The information is known within New Zealand, so no need for overseas assistance.

Page 43 of 93

Long Term Plan Submission Form

Q15	Decision 3 - Kerbside Collection
Multi Choice	Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections
Q16	Kerbside Collection - Additional comments
Long Text	<p>Food waste collection is already being done in Auckland.</p> <p>It was commenced in Papakura in 2019, so the HOW is already known.</p> <p>I feel there should be a limit on garden waste collections via use of a bin to prevent the system being overloaded and abused.</p>
Q17	Decision 4 - Breathing new life into Wairoa businesses
Multi Choice	Option 2 - Annual Investment
Q18	Breathing new life into Wairoa businesses - Additional comments
Long Text	<p>Annual investment only when the Wairoa River bar and mouth issues have been sorted.</p> <p>I see little point in spending big dollars on a glittering town centre, only to see it covered in silt and all the doorways sandbagged every time it rains.</p> <p>I went for a walk around the town centre during the 26 June 2024 weather event, to find just about every doorway sandbagged and the town centre deserted.</p> <p>How do you attract people when there is the potential for this to happen every time it rains.</p>
Q19	Decision 5 - Protecting Our Taonga - The Future of Our Archives
Multi Choice	Option 1 - Keep the archives in Wairoa
Q20	Protecting Our Taonga - The Future of Our Archives - Additional comments
Long Text	<p>Once the records and information leave Wairoa, they will not be returning without a significant increase in the cost. The Wairoa Library would be the most logical choice, as this is what has happened in other centres.</p> <p>The extension to the library would be my choice.</p>
Q21	Any other feedback
Long Text	<p>Wairoa River bar and mouth should be the highest priority.</p> <p>Control of the river mouth excavation should first and foremost be local.</p> <p>Pointless having the executive decisionmaker sitting in office over 100 kilometres away.</p> <p>Without the river issues being sorted first, everything else becomes an almost pointless exercise, because there will no increase in visitors, residents and businesses.</p> <p>Prime Minister Christopher Luxon mentioned stop banks during a recent television news article.</p> <p>Is it not about time that this option was explored as this would give the town two forms of protection from flooding. Stop banks would be a multi generational investment, so could be paid for over an extended period of time and would be a real investment in protecting the township as a whole.</p> <p>You only have to look at what the Gisborne District Council has done in the vicinity of the Waipoua River Bridge.</p> <p>Another option the council could consider is for people to be allowed to install and use their own water tanks if they desire.</p> <p>This has the added benefits of reducing the demand on the council facilities and also allows rainwater to be collected instead of going directly to the ground and overloading the storm water drainage system.</p> <p>SH2 south of Wairoa also needs attention in the vicinity of the 2ate7 complex, to ensure that the town is not isolated both to the north and the south. I understand that part of the state highway network is managed by NZTA.</p>

Long Text

Council would be surporting local business, helping to keep those business running, and keep them in our area. With out local bussiness Wairoa would not exist.
If the council expects us to pay extra on our rates then they would be giving back to those business that have to pay rates on there land buildings by using them and providing an income and jobs to local people and business.

Q11

Q9 Tautoko Wairoa | Buying Locally

Multi Choice Option 2 - Purchase from local business on a case by case basis

Q10 Tautoko Wairoa | Buying Locally - Additional comments

Long Text

I'm not sure what the status quo is currently but council should endeavour to source everything locally before looking outside Wairoa. Tautoko Wairoa / Shop Local should be on signs on each store and each & everyone of us should be reminded that every dollar we spend locally keeps our economy going. Every dollar spent out of town is a nail in the coffin of our businesses.

Q11 Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice Option 1 - Rectification + BAU

Q12 Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

We need to focus on consistent maintenance of both adjacent drainage and road surfacing to decent standards (not always the cheapest repair)

Q13 Decision 2 - Solid waste management and minimisation

Multi Choice Option 1 - Development of a New Landfill Cell

Q14 Solid waste management and minimisation - Additional comments

Long Text

With the extensive county area of the Wairoa region, we need to manage our own waste and encourage everyone to minimise their refuse. Recycling and repurposing as much as possible.

Q15	Decision 3 - Kerbside Collection
Multi Choice	Option 1 - Business as usual
Q16	Kerbside Collection - Additional comments
Long Text	Food waste is not appropriate for kerbside collection. Encouraging connectivity between consumers and community composting facilities / or perhaps feeding pigs via online community pages?
Q17	Decision 4 - Breathing new life into Wairoa businesses
Multi Choice	Option 1 - No investment
Q18	Breathing new life into Wairoa businesses - Additional comments
Long Text	All Wairoa store owners should be aware of the bylaws associated with owning a building. It is essential that these bylaws are enforced otherwise there is no point in having them. Most retailers in town do their best to maintain ageing buildings but there are absentee landlords that need to be reminded of due diligence. The trees planted on the shop side of the main street need removing and replacing with lower growing shrubs. Sorting the stormwater issues at the rear of many stores is crucial. Drainage or the lack of it needs to be addressed. Encouraging all employees of Council (in fact everyone district-wide to shop local where possible could mean businesses are able to upgrade their own store fronts. Temu will do nothing for sports teams etc but local businesses continually donate both goods and services for the benefit of the community.
Q19	Decision 5 - Protecting Our Taonga - The Future of Our Archives
Multi Choice	Option 1 - Keep the archives in Wairoa
Q20	Protecting Our Taonga - The Future of Our Archives - Additional comments
Long Text	Is there no space at the museum? Or is there no other appropriate building in town that may be cheaper to upgrade for the purpose of storing our Taonga? Assuming that much is microfilmed or whatever the modern equivalent is - could some evaluation be done as to minimising what is actually held?
Q21	Any other feedback
Long Text	Councils objectives should be to focus on the basics. Our town is beautiful and will shine again if the essentials are dealt with. Keeping our streets clean, gutters swept, stormwater gratings removed and any buildup cleared, rubbish bins near schools, trees trimmed appropriately, community buildings spoutings cleared 6 monthly..... Restoring a sense of pride in every individual who lives here. Love local ☺☺

Q16 Kerbside Collection - Additional comments

Long Text In light of the recent flooding in Wairoa, which has compounded the ongoing recovery efforts from Cyclone Gabrielle, the Council must prioritise essential services and recovery. Pursuing non-essential initiatives at this time is not feasible.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 1 - No investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text In light of the recent flooding in Wairoa, which has compounded the ongoing recovery efforts from Cyclone Gabrielle, the Council must prioritise essential services and recovery. Pursuing non-essential initiatives at this time is not feasible. We cannot afford \$300k for this the impact on resident rates proposed in this plan are off the scale! Businesses should be doing this themselves as a part of running a good business. There are ample examples of this already up the Main Street. Not sure rate payer should footing the bill. Perhaps consider an optional loan that can be recovered via a targeted rate?

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 1 - Keep the archives in Wairoa

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text Have a look at both options and present to the public in due course once you have investigated both more fully.

Q21 Any other feedback

Long Text Although this plan was developed prior to the recent flooding, the Council must significantly reprioritise essential services and recovery efforts. Pursuing non-essential initiatives at this time is not feasible and would have a severe impact on rates, further burdening an already struggling community. Certain aspects of the plan are not suitable given the current circumstances. Additionally, I am concerned that the Council has implemented fees and charges increases from 1 July while the plan is still under consultation. This appears to be ultra vires.

Multi Choice

Option 2 - Purchase from local business on a case by case basis

Q10

Tautoko Wairoa | Buying Locally - Additional comments

Long Text

Why: Option 2 - Purchase from local business on a case by case basis

Economic Growth and Job Creation:

Stimulates the Local Economy: Money spent locally stays within the community, helping to circulate wealth and support local businesses.

Job Creation: Supporting local businesses can lead to more job opportunities within the community.

Sustainability and Environmental Benefits:

Reduced Carbon Footprint: Local procurement often results in lower transportation emissions since goods and services don't have to be shipped from far away.

Sustainable Practices: Local businesses may be more likely to adhere to local environmental standards and regulations.

Community Development and Social Benefits:

Stronger Community Ties: Local procurement fosters stronger relationships and a sense of community among local businesses, residents, and the council.

Social Equity: Supporting local businesses can help to reduce economic disparities within the community.

Quality and Accountability:

Better Quality Control: Local suppliers are often more accessible, allowing for better communication and quality control.

Accountability: Local businesses are more likely to be accountable to the community and responsive to the council's needs and concerns.

Resilience and Self-Sufficiency:

Page 55 of 93

Long Term Plan Submission Form

Economic Resilience: A diverse local economy can be more resilient to external economic shocks.
 Self-Sufficiency: Supporting local industries can make a community more self-sufficient and less dependent on external sources for goods and services.
 Customized Solutions:

Tailored Services: Local businesses are often better able to provide customized services and solutions that meet the specific needs of the community.

Flexibility: Smaller, local businesses can be more flexible and responsive to changes in demand or circumstances.
 By prioritizing local procurement, councils can help build a more vibrant, sustainable, and resilient community.

Q11 Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice Option 2 - Rectification + BAU + Targeted improvement

Q12 Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text Why: Option 2 Rectification + BAU + Targeted improvement

Future-Proofing: Given the history of extreme weather events, investing in targeted improvements can make the transport network more resilient to future events, potentially saving costs and disruptions in the long run.

Community Expectations: The community likely expects not only a return to normalcy but also improvements that can help prevent or mitigate future issues.

Long-Term Value: Although the initial costs are higher, the long-term benefits of a more robust and efficient transport network justify the investment.

Investing in improvements alongside rectification not only addresses current needs but also prepares the community for future challenges, aligning with sustainable development and resilience goals.

Q13 Decision 2 - Solid waste management and minimisation

Multi Choice Option 2 - Out of District Disposal

Q14 Solid waste management and minimisation - Additional comments

Long Text Why: Option 2 - Out of District Disposal

Environmental Considerations: Transporting waste to a more advanced external facility can result in better environmental outcomes, especially if the external facility has superior waste processing and recycling capabilities.
 Cost Efficiency: While there are transportation costs, avoiding the substantial upfront investment required to develop a new landfill cell can be more financially prudent, especially if the district can negotiate favorable terms with the external facility.

Encouragement of Sustainable Practices: The higher costs associated with out-of-district disposal can incentivize the community and local government to adopt more aggressive waste minimisation, recycling, and composting programs, aligning with broader sustainability goals.

Flexibility and Risk Management: Utilizing external facilities provides flexibility and can mitigate risks associated with the long-term management of a local landfill, such as regulatory changes or unforeseen environmental impacts.
 Opting for out-of-district disposal not only addresses the immediate need for waste management but also aligns with long-term sustainability and environmental goals, fostering a more responsible approach to waste generation and disposal.

Q15 Decision 3 - Kerbside Collection

Multi Choice Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections

Q16 Kerbside Collection - Additional comments

Long Text Why: Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections

Sustainability Goals: Aligns with broader environmental sustainability goals by reducing landfill waste and greenhouse gas emissions.

Long-Term Benefits: While there are initial costs, the long-term benefits of reduced landfill use and the production of compost can offset these expenses.

Community Health and Engagement: Encouraging residents to separate organic waste can lead to greater community engagement in environmental issues and healthier waste management practices.

Regulatory and Policy Alignment: Many regions are moving towards stricter waste management regulations, and adopting this model now can position Wairoa District ahead of potential future requirements.

Implementing a new kerbside collection model that includes food waste and garden organics not only addresses immediate waste management needs but also supports long-term environmental and community health goals.

Q17	Decision 4 - Breathing new life into Wairoa businesses
Multi Choice	Option 2 - Annual Investment
Q18	Breathing new life into Wairoa businesses - Additional comments
Long Text	<p>Why: Option 2 - Annual Investment</p> <p>Economic Vitality: Regular investment in business facades can stimulate economic growth by attracting more visitors, shoppers, and new businesses, leading to a more prosperous community.</p> <p>Community Pride and Engagement: A well-maintained and attractive business area fosters a sense of pride among residents, encouraging greater community involvement and support for local businesses.</p> <p>Tourism and Attraction: Enhanced aesthetics can make Wairoa more attractive to tourists, bringing in additional revenue and boosting the local economy.</p> <p>Long-Term Vision: Committing to annual investments shows a long-term vision for the town's development, positioning Wairoa as a forward-thinking and proactive community.</p> <p>Investing annually in the revitalization of Wairoa's business facades can bring substantial long-term benefits, fostering economic growth, community pride, and an enhanced quality of life for residents.</p>
Q19	Decision 5 - Protecting Our Taonga - The Future of Our Archives
Multi Choice	Option 1 - Keep the archives in Wairoa
Q20	Protecting Our Taonga - The Future of Our Archives - Additional comments
Long Text	<p>Why: Option 1 - Keep the archives in Wairoa</p> <p>Community Access and Engagement: Keeping archives locally ensures that the community retains easy access to its historical records, fostering a stronger connection to local heritage and identity.</p> <p>Local Control: Maintaining local control over the archives allows for tailored management and oversight, ensuring that records are handled in a way that aligns with community values and needs.</p> <p>Cultural Significance: Archives are not just records; they are taonga (treasures) that embody the history and culture of Wairoa. Keeping them locally emphasizes their importance and respects their cultural significance.</p> <p>Long-Term Vision: While there are initial costs associated with upgrading the facility, investing in local infrastructure demonstrates a commitment to preserving and valuing the community's history for future generations.</p> <p>By investing in the necessary upgrades to keep the archives in Wairoa, the council can ensure that these valuable records remain accessible, secure, and an integral part of the community's cultural heritage.</p>
Q21	Any other feedback
Long Text	<p>General Feedback Across All Scenarios:</p> <p>Community Engagement: Involve the community in decision-making processes to ensure that their needs and preferences are understood and addressed.</p> <p>Sustainability: Prioritize options that align with long-term sustainability goals, including environmental, economic, and social considerations.</p> <p>Funding and Grants: Explore all available funding opportunities, including government grants, public-private partnerships, and community fundraising efforts.</p> <p>Strategic Planning: Develop comprehensive plans that include short-term actions and long-term strategies to ensure that the chosen options are effectively implemented and managed.</p> <p>By considering these additional points, the Wairoa District Council can make more informed and strategic decisions that best serve the community's needs and future aspirations.</p>

Where appropriate and clear community impact is demonstrated through purchasing locally.

Q11

Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice

Option 1 - Rectification + BAU

Q12

Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

Rationalize the projects included in land transport as there are a number that do not meet the requirements of the Government Policy Statement on Land Transport 2024-34 (GPS). Council should not be budgeting for and subsequently rating the local share for projects that are highly unlikely to receive co-funding from NZTA through the application of the GPS. An example of a project included in the Councils LTP Consultation document that is unlikely to receive funding from NZTA is the \$4.66M for Road Safety Improvements. This would result in \$625k impact to ratepayers (regardless of loan funding or direct to rates). At this time, ratepayers do not have the ability to increase levels of service across the network and request council to review the proposed "BAU" in addition.

The district has invested heavily over the last 9 years in levels of service to the urban and rural communities. I believe this should be scaled back this 3-year plan to reflect returning levels of service and allow the community to invest in other priorities.

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 1 - Development of a New Landfill Cell

Page 60 of 93

Long Term Plan Submission Form

Q14 Solid waste management and minimisation - Additional comments

Long Text

Wairoa has the space, buy-in and ability to service its own waste and a long-term investment is granted. Exploring options with adjoining Councils on co-ownership would be worth investigating prior to defaulting to the out of district proposal.

The landfill operations are a business and employment opportunity and should be explored with a commercial and long term view.

Q15 Decision 3 - Kerbside Collection

Multi Choice

Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections

Q16 Kerbside Collection - Additional comments

Long Text

To complement decision 2.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice

Option 2 - Annual Investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text

Option 2 with a focus on investing in monitoring and enforcement of Councils bylaws after the project is complete to ensure long term investment is maintained.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice

Option 1 - Keep the archives in Wairoa

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text

The management and protection of archives is a bespoke technical skill that is unlikely to be successfully resourced in Wairoa. The protection of physical archives will be ensured if investment into local facilities is made. I trust the Council will weigh up all options and make the best decision available at the time for our future generations.

Q21 Any other feedback

Long Text

When considering "what your rates pay for" it is apparent that Council spends \$13.12/ week on Governance and Community which is second to Transport. It is concerning there is no optioneering or feedback required for our community regarding Governance and Community - how can the second most expensive activity not attract a discussion? Is it a fait accompli?

Q9 Tautoko Wairoa | Buying Locally

Multi Choice Option 2 - Purchase from local business on a case by case basis

Q10 Tautoko Wairoa | Buying Locally - Additional comments

Long Text

I believe it is prudent to get the best value for money when using tax payer/ rate funds, but also feel strongly about supporting our own. May I suggest a certain percentage can be set aside for mandatory support of local businesses - say 25% local purchase, 75% nationally sourced. Many local businesses simply can't compete financially, but I'd be perfectly ok with a smidge extra spent to support local. Without business incentives here, our town will die.

Q11 Decision 1 - Essential Repairs or Improvements to Our Land Transport Network

Multi Choice Option 2 - Rectification + BAU + Targeted improvement

Q12 Essential Repairs or Improvements to Our Land Transport Network - Additional comments

Long Text

What is BAU? Please don't assume everyone knows the acronyms you use, especially when asking for public submissions.

Q13 Decision 2 - Solid waste management and minimisation

Multi Choice Option 1 - Development of a New Landfill Cell

Q14 Solid waste management and minimisation - Additional comments

Long Text

I realise waste management is a huge cost. You have an opportunity to be innovative here and perhaps even create new job opportunities with new industry. Rather than bury everything, look to alternative options, with perhaps investment from other Hawkes Bay councils and from Kanoa for a regional solution. There are recycling plants, waste-to-energy bio fuel plants etc that create their own electricity & biofuel etc (there are even small portable plants which may suit us). Fortune favours the brave and there is no reason why we can't be leaders in a field - even

if it's rubbish disposal. So much rubbish goes to landfill purely because we can't recycle.

Q15 Decision 3 - Kerbside Collection

Multi Choice Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections

Q16 Kerbside Collection - Additional comments

Long Text A weekly regular wheelie bin collection for a small extra cost to the rate payer would be ideal. I currently pay \$25 per collection for my Smart Environmental wheelie bin. That's \$200-\$225 a month on top of my rates, which is outrageous and unaffordable, so. I only use this service once a month, sometimes 2 months. Garden waste collection would be great, as many people don't have trailers for disposal. Easier ways to remove household rubbish is encouraged to reduce pests and eliminate the need for dangerous home burn offs - this would also surely reduce the high amount of home fires we seem to have in Wairoa.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 2 - Annual Investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text Without local business and jobs, our town will die. We can't put all our eggs in the Affco basket. We all judge a book by its cover, so town beautification is important. However, flood mitigation measures are needed to provide peace of mind for business owners. If I had a business in North Clyde, I would be hesitant to move back there unless I was assured the area wouldn't flood again. People's emotional reserves and resilience can only stretch so far

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 2 - Move archives out of district

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text Keep records in the safest place. Protection outweighs all else. If this needs to be moved outside of Wairoa, I would prefer a consolidation of Hawkes Bay records - keep all Hawkes Bay records in the one place if this presents a financial compromise/benefit for all HB councils. That way, it is still considered & kept local.

Q21 Any other feedback

Long Text While I'm here, some ideas...

(1) Have you considered any events that could be tacked on to the popular Napier Art Deco weekend? After the floods, people want to support Wairoa and the few visitors I know who have come here are always surprised how nice the town is. There is a perception that Wairoa is crawling with visible patched Mob members and is unsafe. But we know better. Creating a national campaign to come support Wairoa by visiting for an event might be a great financial support for us. Add a market for local artisans and micro businesses (free for local, out-of-towners can pay for stalls), street parade etc. Look at all the fun events Napier & Hastings do. Can we copy them? Can we further enhance the recent Matariki events & celebration, and make that the event Wairoa is known for?

(2) I know there are reasons why we likely can't but could we invest in a proper permanent bar for our river mouth like they did for Opotiki with the intention of creating new industry with it, as a bonus.. eg a mussel farm, a jetty for small boats, or my wish list item of a small ferry that goes to Napier & back - tourist and new business/ job opportunities, plus a lifeline for any future weather even that closes our roads and cuts us off. I'm thinking the maintenance costs would be far less than road maintenance and no remediation costs compared with fixing road slips. You can even attach units that create clean electricity from waves. A potential power source for council that you could create revenue from.

(3) When considering the new development of North Clyde, could you include a large Tourist Stop that attracts travellers as a destination and encourages them to bypass SH1 and breathe new life into our regional towns (the Gull area would be perfect). Perhaps relocate and expand the iSite there and include incentives/room for local artisans and micro businesses to sell wares there (you keep % of sales). Can we create NZ's best school holidays events & programs that encourage day trips to Wairoa or staying at our camping grounds etc.

I'll stop now, lol. Cheers

I think it would be lovely if you were able to purchase stationary from our local book shop, and books for our local library.

The more you support it will increase chances of bulk buying and potential to secure discounts.

This could encourage other local business to consider the same approach.

Long Text

I like the idea of introducing general rubbish being collected.

We do not require use of food waste collection (our friends have pigs we feed) or garden organic. Is it possible to have a survey to see how many people would access this service (seperate to this form) to see the potential use?

Definitely great idea though!

Q13

Decision 2 - Solid waste management and minimisation

Multi Choice

Option 1 - Development of a New Landfill Cell

Q14

Solid waste management and minimisation - Additional comments

Long Text

Disposal of Wairoa rubbish in another town/country is not a desirable choice. Wairoa needs to become more self sufficient and sustainable, we can do this :)

Q15

Decision 3 - Kerbside Collection

Multi Choice

Option 1 - Business as usual

Page 88 of 93

Long Term Plan Submission Form

Q16 Kerbside Collection - Additional comments

Long Text It would be a better idea to educate the community on having their own composting system. Maybe, a discussion for the MSC, to reach out to marae to help educate whanau. Even involving Mens Shed, to build compost containers for homes - this would be a cheaper option for whanau.

Q17 Decision 4 - Breathing new life into Wairoa businesses

Multi Choice Option 2 - Annual Investment

Q18 Breathing new life into Wairoa businesses - Additional comments

Long Text Businesses on both sides of the bridge are in dire need of revitalization and uplifting. Despite the climate events Wairoa is experiencing, to enhance the town, on both sides of the bridge, will encourage more respect and pride from the community. It may even encourage more traffic to call in for a cuppa rather than just drive through.

Q19 Decision 5 - Protecting Our Taonga - The Future of Our Archives

Multi Choice Option 2 - Move archives out of district

Q20 Protecting Our Taonga - The Future of Our Archives - Additional comments

Long Text This is a hard one to choose, because, ideally you would like to keep the archives here for easier access for researchers, university students etc. I suppose it would depend on what the on-going costs are to keep them stored here, in a fit for purpose building, or housed out of town, in a building that is suited to house archives.

Long Text Wairoa District Council can enhance its infrastructure, economic resilience, and community well-being while minimizing the financial burden on ratepayers by possibly keeping up on these areas:

- 1) Seek Funding and Grants:
 - Apply for disaster recovery funds and infrastructure grants from central government.
 - Explore partnerships with private investors and non-governmental organizations for funding community projects.
- 2) Economic Diversification:
 - Promote tourism by highlighting Wairoa's natural attractions and cultural heritage.
 - Support local businesses with grants, training, and marketing assistance.
 - Encourage agricultural innovation and sustainable practices to boost productivity.
- 3) Enhance Infrastructure:
 - Prioritize repairing and upgrading essential infrastructure such as roads, bridges, and water supply systems.
 - Invest in digital infrastructure to improve broadband and internet access, supporting remote work and education.
- 4) Community Engagement and Services:
 - Increase transparency and communication with ratepayers through regular updates, public meetings, and online platforms like this yet we do need to engage more with them and let know it can be done here online.
 - Improve access to health and education services by collaborating with regional health boards and educational institutions.
 - Develop affordable housing projects in partnership with private developers and housing agencies.
- 5) Disaster Resilience and Environmental Sustainability:
 - Create and implement comprehensive disaster management plans, including community training and early warning systems.
 - Invest in sustainable waste management and conservation projects to protect the local environment.
 - Promote the use of renewable energy sources and energy-efficient practices within the community.

Tautoko Wairoa Buying Locally	Option 1 - Maintain status quo	1
	Option 2 - Purchase from local business on a case by case basis	
Tautoko Wairoa Buying Locally - Additional comments		
Decision 1 - Essential Repairs or Improvements to Our Land Transport Network	Option 1 - Rectification + BAU	1
	Option 2 - Rectification + BAU + Targeted improvement	
Essential Repairs or Improvements to Our Land Transport Network - Additional comments		
Decision 2 - Solid waste management and minimisation	Option 1 - Development of a New Landfill Cell	1
	Option 2 - Out of District Disposal	

Solid waste management and minimisation - Additional comments		Out of District Disposal option is an environmental lie - it's called "Green Washing". It does not make you better "environmental performers" it is still your rubbish hiding in someone else's backyard. I would have liked to have read what ideas/solutions, if any, mana whenua or para kore have. Are they viable? I am not a fan of a new cell either but we do need one. At the same time the public need ideas on how to do the 4 Rs and why. Ask Wairoa Groups that are already doing this for ideas/help/information ie. like you wanted to do "by Wairoa, for Wairoa, use local".
Decision 3 - Kerbside Collection	Option 1 - Business as usual	1
	Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections	
Kerbside Collection - Additional comments		
Decision 4 - Breathing new life into Wairoa businesses	Option 1 - No investment	1
	Option 2 - Annual Investment	
Breathing new life into Wairoa businesses - Additional comments		
Decision 5 - Protecting Our Taonga - The Future of Our Archives	Option 1 - Keep the archives in Wairoa	1
	Option 2 - Move archives out of district	
Protecting Our Taonga - The Future of Our Archives - Additional comments		It is not ideal to give options without any information to guide the decision making process.

Tautoko Wairoa Buying Locally	Option 1 - Maintain status quo	
	Option 2 - Purchase from local business on a case by case basis	
Tautoko Wairoa Buying Locally - Additional comments		Yes to both options
Decision 1 - Essential Repairs or Improvements to Our Land Transport Network	Option 1 - Rectification + BAU	
	Option 2 - Rectification + BAU + Targeted improvement	
Essential Repairs or Improvements to Our Land Transport Network - Additional comments		Mixed model
Decision 2 - Solid waste management and minimisation	Option 1 - Development of a New Landfill Cell	
	Option 2 - Out of District Disposal	
Solid waste management and minimisation - Additional comments		Certainly toxic material hazard
Decision 3 - Kerbside Collection	Option 1 - Business as usual	
	Option 2 - Introduction of a new kerbside collection model including food waste and garden organic collections	
Kerbside Collection - Additional comments		sounds good as each can afford
Decision 4 - Breathing new life into Wairoa businesses	Option 1 - No investment	
	Option 2 - Annual Investment	
Breathing new life into Wairoa businesses - Additional comments		both add to experience
Decision 5 - Protecting Our Taonga - The Future of Our Archives	Option 1 - Keep the archives in Wairoa	
	Option 2 - Move archives out of district	
Protecting Our Taonga - The Future of Our Archives - Additional comments		I'd would very much like Ross to get the facilities that he was employed to delivery those many years ago. Some of the most beautiful mahi

		has been lost because of long overdue care and attention.
Any other feedback		Kia ora, Find all these questions as binary options ie closed questions with only 2 answers. Hei aha It's a yes to both options.
